Career Development in Academic Radiation Oncology Ravi A. Chandra, Neha Vapiwala, Charles R. Thomas Jr., 2021-05-25
This book offers comprehensive career development advice for professionals in radiation oncology. While numerous texts have been published to advise medical students on entry into the specialty and to guide residents and junior faculty with exam preparation, there remains a need for a comprehensive resource that covers topics pertinent to a successful career within radiation oncology. This text has been edited and written by leading experts in the field and offers multiple unique vantage points. This work is divided into five sections covering career planning applying to faculty positions, early career development, mid and senior career considerations, and contextual issues. Throughout the text, authors balance nuts and bolts, e.g., preparing your CV and evaluating a contract with big picture considerations. Each chapter is written concisely yet comprehensively from the vantage point of a mentor advising a mentee. Questions to review with local mentors and additional reading suggestions are also provided. Issues of workforce disparities, conscious and unconscious bias, work-life equilibrium, and interpersonal conflict, and how these may impact one's career path are also closely addressed. While the work is primarily targeted to those pursuing career paths within academic medicine, there is also distinct value and tailored content for trainees and radiation oncologists practicing in hospital-based, hybrid, or community settings. In a period of rapid change in the healthcare sector and cancer care, more specifically, this book will serve as the premier reference for those pursuing an independent career in radiation oncology.
