

Textbook Evaluation Instrument Based on the ACTFL Standards

The Standards for Foreign Language Learning afford us the opportunity to review every aspect of our delivery of instruction. One such element to be considered is textbook selection. Based on the Standards, textbook evaluation has become expanded to include the 5 C's as well as the seven curricular elements. What follows is a sample textbook evaluation instrument that uses the Standards' organizing principles and elements as the points of comparison among different textbooks. Suggested numerical values have been given for each of the five organizing principles and curricular elements to assist in the selection process.

This instrument will help you evaluate as many as four different programs. Each question in a section has been given a maximum point value which you can use to rate the program. If scores between programs run close, go back to the section(s) that mean the most to you and compare those scores.
