Economic Disparity Jae Wan Chung,2015-04-09 The world is a veritable stage for superpowers Major historical events are
best viewed as the outcomes of games played by superpowers for their own economic interests The objective of this book is
to explore the primary cause of global historical events A global economic disparity GED motivates superpowers to pursue
their interests and results in the corresponding global historical event GHE This book explores the causal relationships
between GEDs and GHEs that stand out in recent global history since the first Industrial Revolution taking a geoeconomic
approach which encompasses economics international political affairs history and geography The book confirms the
causalities between GEDs and GHEs It is a pioneering work that provides a unique but powerful policy implication in order to
alleviate international conflicts and tensions between superpowers it is necessary to reduce GEDs And since it is virtually
impossible for a few superpowers to reduce the GEDs the world economy needs a multipolar economic system for global
stability through competition The book was written shortly after the world economy was trapped within downward spirals
caused by the US financial crisis and its contagion As a collective representation of GEDs in various areas the financial
disparity is a central part of GEDs The book rigorously examines the financial crisis 2008 2014 in the United States and the
Fed s response a program of quantitative easing QE implemented in three phases while bearing in mind that the origin of the
current crisis is not solely the financial sector or stock markets but worldwide economic disequilibrium This book also
focuses on the details for the causal relationships prevailing in several major areas human resources raw materials energy
environment and poverty *Catalogue of Printed Books* British Museum,1896 **The English Catalogue of Books ...:**
