Social Psychology and Theories of Consumer Culture Matthew McDonald, Stephen Wearing, 2013 *Social Psychology and Theories of Consumer Culture A Political Economy Perspective* presents a critical analysis of the leading

positions in social psychology from the perspective of classical and contemporary theories of consumer culture The analysis seeks to expand social psychological theory by focusing on the interface between modern western culture consumer culture and social behaviour McDonald and Wearing argue that if social psychology is to play a meaningful role in solving some of society's most pressing problems e.g global warming obesity addiction alienation and exclusion then it needs to incorporate a more comprehensive understanding and analysis of consumer culture Wide ranging and challenging the book offers a fresh insight into critical social psychology appropriate for upper undergraduate and postgraduate courses in personality social psychology critical and applied psychology It will also appeal to those working in clinical counselling abnormal and environmental psychology and anyone with an interest in the integration of social psychology and theories of consumer culture

**Geological Disposal of Carbon Dioxide and Radioactive Waste: A Comparative Assessment** Ferenc L. Toth, 2011-02-21 Fossil fuels will remain the backbone of the global energy economy for the foreseeable future The contribution of nuclear energy to the global energy supply is also expected to increase With the pressing need to mitigate climate change and reduce greenhouse gas emissions the fossil energy industry is exploring the possibility of carbon dioxide disposal in geological media Geological disposal has been studied for decades by the nuclear industry with a view to ensuring the safe containment of its wastes Geological disposal of carbon dioxide and that of radioactive waste gives rise to many common concerns in domains ranging from geology to public acceptance In this respect comparative assessments reveal many similarities ranging from the transformation of the geological environment and safety and monitoring concerns to regulatory liability and public acceptance issues However there are profound differences on a broad range of issues as well such as the quantities and hazardous features of the materials to be disposed of the characteristics of the targeted geological media the site engineering technologies involved and the timescales required for safe containment at the disposal location There are ample opportunities to learn from comparisons and to derive insights that will assist policymakers responsible for national energy strategies and international climate policies

**Designing Safe Road Systems** Jan Theeuwes, Richard van der Horst, 2017-09-18 Many books focus on individual differences and how those relate to traffic safety such as accident proneness gender differences age alcohol and the effects of drugs Others focus on the safety effects regarding the vehicle such as airbags anti lock brakes navigation systems intelligent cruise control and other new gadgets coming to the vehicle Even though these topics are undoubtedly important for traffic safety this book takes a unique approach as it focuses solely on the road environment Designing Safe Road Systems provides the background for those who want to know more about the effects of road design on driving behaviour It uses a systems approach to allow a better understanding of why and in what circumstances drivers may commit errors This understanding will ultimately lead to road systems that prevent fatal errors from occurring The book contains an overview of the current models and theories about human performance and human behaviour in traffic that are relevant for all those involved in designing safe road systems The central theme of this book is

how design principles can reduce the probability of an error while driving The authors demonstrate how knowledge of human factors helps a road authority to better understand how road users behave They argue that in many cases the design of the environment can be further adjusted to human capabilities and that safety should be considered a system property to be built into the road system
