Architects Data Ernst Neufert:

Architects' Data Ernst Neufert, Peter Neufert, 2012-03-26 Neufert's Architects Data is an essential reference for the initial design and planning of a building project. It provides in one concise volume the core information needed to form the framework for the more detailed design and planning of any building project. Organised largely by building type, it covers the full range of preliminary considerations and with over 6200 diagrams it provides a mass of data on spatial requirements. Most illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. An extensive bibliography and a detailed set of metric/imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 39 editions and many translations. This fourth English language edition is translated from the 39th German edition and represents a major new edition for an international English speaking readership. Reviews of the Previous Edition: Neufert's Architects Data was the first book I bought when I started my studies in architecture. It was invaluable for me then and it is still a useful aid in my designs. Cesar Pelli. With this thorough rewrite, Neufert has produced yet again an invaluable reference book. The Architects Journal.

Architects' Data Ernst Neufert, 2019-08-05 An indispensable tool for the beginning stages of designing and planning a building project. This new edition of a classic bestselling text provides in one concise volume the essential information needed to form the framework for the more detailed design and development of any building project. Organized largely by building type, it covers planning criteria and considerations of function and siting and with over 6200 diagrams it provides a mass of data on spatial requirements. Most of the featured illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. The book also includes an extensive bibliography and detailed set of metric/imperial conversion tables. Architects Data starts with the basics of designing for a new building project before moving on to covering everything an architect needs to know. It also looks at the design styles and specifications for creating different types of structures such as those made for residential, religious, cultural, sports, medical and other types of occupation. Covers user requirements, planning criteria, basic dimensions and considerations of function and siting. Includes numerous examples and over 6200 illustrations and tables. 5th English edition of the classic international reference for architects. Architects Data is an excellent resource for architects, building surveyors, space planners and design and build contractors everywhere.

Architectures of Bureaucracy Jens van de Maele, 2025-01-27 This monograph examines the interrelationship

between politics and modernist architecture in interwar Belgium focusing on political architectural and administrative elites as propagators of new ideas of governance While Belgium was strongly influenced by neighbouring France and Germany it also developed its own avant garde approaches to socio political problems In the second half of the 1930s the country was the scene of a remarkable political and architectural experiment involving an ambitious plan for the large scale construction of modernist government office buildings These buildings were seen as essential to the development of a technocratic model of governance aimed at strengthening the role of the executive and minimising the influence of parliament More specifically the efficient new office architecture was supposed to create a new type of perfect civil servant whose loyalties would no longer lie with political parties but with scientists and management experts Such experts and scientists constituted a rising elite of homines novi with strong though often veiled political ambitions As such this book contributes to our understanding of political culture in the age of extremes

Architects' Data Ernst Neufert, Peter Neufert, 1991-01-15 This is an essential aid in the initial design and planning of a project The relevant building type is located by a comprehensive index and cross reference system a condensed commentary covers user requirements planning criteria basic dimensions and other considerations of function siting aspect etc A system of references based on an extensive bibliography supports the text In every section plans sections site layouts design details and graphs illustrated key aspects of a building type s design Most illustrations are dimensioned or scaled the metric system of measurement is used throughout and the equivalent in feet inches can easily be read either off a graphic scale on the page or from the built in conversion table The illustrations are international in origin and include both well know and less famous designers Architects Data is primarily a handbook of building types rather than of construction techniques and details However its treatment of components such as doors and windows and of spaces for building services is extremely thorough since consideration of this data is an essential element of the planning process The opening pages of basic data on man and his buildings cover critical subjects such as scale drawing practice noise light and space for the same reason Particular attention has also been paid to the implications of energy conservation means of escape from fire and the needs of the elderly and the disabled
