Computational Nanoscience Kalman Varga, Joseph Andrew Driscoll, 2011 Describes advanced algorithms for students in computational physics quantum mechanics atomic and molecular physics and condensed matter theory **Computational Nanoscience** Kálmán Varga, Joseph A. Driscoll, 2011-04-14 Computer simulation is an indispensable research tool in modeling understanding and predicting nanoscale phenomena However the advanced computer codes used by researchers are too complicated for graduate students wanting to understand computer simulations of physical systems This book gives students the tools to develop their own codes Describing advanced algorithms the book is ideal for students in computational physics quantum mechanics atomic and molecular physics and condensed matter theory It contains a wide variety of practical examples of varying complexity to help readers at all levels of experience An algorithm library in Fortran 90 available online at www.cambridge.org/9781107001701 implements the advanced computational approaches described in the text to solve physical problems *Relocating the History of Science* Theodore Arabatzis, Jürgen Renn, Ana Simões, 2015-05-19 This volume is put together in honor of a distinguished historian of science Kostas Gavroglu whose work has won international acclaim and has been pivotal in establishing the discipline of history of science in Greece its consolidation in other countries of the European Periphery and the constructive dialogue of these emerging communities with an extended community of international scholars The papers in the volume reflect Gavroglu s broad range of intellectual interests and touch upon significant themes in recent history and philosophy of science They include topics in the history of modern physical sciences science and technology in the European periphery integrated history and philosophy of science historiographical considerations and intersections with the history of mathematics technology and contemporary issues They are authored by eminent scholars whose academic and personal trajectories crossed with Gavroglu s The book will interest historians and philosophers of science and technology alike as well as science studies scholars and generally readers interested in the role of the sciences in the past in various geographical contexts **Proceedings of the Second International Conference on Computer and Communication Technologies** Suresh Chandra Satapathy, K. Srujan Raju, Jyotsna Kumar Mandal, Vikrant Bhateja, 2015-09-03 The book is about all aspects of computing communication general sciences and educational research covered at the Second International Conference on Computer Communication Technologies held during 24-26 July 2015 at Hyderabad It hosted by CMR Technical Campus in association with Division V Education Research CSI India After a rigorous review only quality papers are selected and included in this book The entire book is divided into three volumes Three volumes cover a variety of topics which include medical imaging networks data mining intelligent computing software design image processing mobile computing digital signals and speech processing video surveillance and processing web mining wireless sensor networks circuit analysis fuzzy systems antenna and communication systems biomedical signal processing and applications cloud computing embedded systems applications and
