Computer Science Behrouz A. Forouzan, Richard F. Gilberg, 2001 All programs and functions are developed in a consistent and readable style based on the authors experience in industry and academia **BOOK JACKET** *Communicating Process Architectures 2004* Ian East, J. Martin, Peter H. Welch, 2004 Communicating Process Architecture CPA describes an approach to system development that is process oriented It makes no great distinction between hardware and software It has a major root in the theory of Communicating Sequential Processes CSP However the underlying theory is not limited to CSP The importance of mobility of both channel and process within a network sees integration with ideas from the calculus Other formalisms are also exploited such as BSP and MPI The focus is on sound methods for the engineering of significant concurrent systems including those that are distributed across the Internet or within a single chip and or software scheduled on a single execution unit Traditionally at CPA the emphasis has been on theory and practice developing and applying tools based upon CSP and related theories to build high integrity systems of significant size In particular interest focuses on achieving scalability and security against error The development of Java C and C libraries to facilitate secure concurrent programming using mainstream languages has allowed CPA to continue and proliferate This work continues in support of the engineering of distributed applications Recently there has been greater reference to theory and its more direct application to programming systems and languages In this volume the formal CSP is very well presented The papers provide a healthy mixture of the academic and commercial software and hardware application and infrastructure which reflects the nature of the discipline

Tutorials on Emerging Methodologies and Applications in Operations Research Institute for Operations Research and the Management Sciences. problem solving efforts OR's strengths are modeling analysis and algorithm design It provides a quantitative foundation for a broad spectrum of problems from economics to medicine from environmental control to sports from e-commerce to computational geometry The primary purpose of TUTORIALS ON EMERGING METHODOLOGIES AND APPLICATIONS IN OPERATIONS RESEARCH is to provide a reference for practitioners and academics who seek a clear concise presentation of developing methodologies hence providing themselves with the capability to apply these methods to new problems The field of Operations Research is always changing Its changes are driven by the technology it uses and that it extends and the applications that it affects Relevant changes in the field have a permanent effect on the conduct of OR and are vital to anyone who wants to be current in the field Each chapter presents a new developing methodology in Operations Research Each chapter examines each topic with clarity and depth and organizes the examination around the following questions 1 What the developing methodology basically is about 2 Why is it important and 3 Where can I learn more

[Computer Vision - ECCV 2004](#) Tomas Pajdla, Jiri Matas, 2004-05-11 Welcome to the proceedings of the 8th European Conference on Computer vision Following a very successful ECCV 2002 the response to our call for papers was almost equally strong 555 papers were submitted We accepted 41 papers for oral and 149 papers for poster presentation Several innovations were introduced into the review process First the number of program committee members was increased to reduce their review load We managed to assign to program committee members no more than 12 papers Second we adopted a paper ranking system Program committee members were asked to rank all the papers assigned to them even those that were reviewed by additional reviewers Third we allowed authors to respond to the reviews consolidated in a discussion involving the area chair and the reviewers Fourth their reports their reviews and their responses were made available to the authors as well as to the program committee members Our aim was to provide the authors with maximal feedback and to let the program committee members know how authors reacted to their reviews and how their reviews were or were not reflected in the final decision Finally we reduced the length of reviewed papers from 15 to 12 pages The preparation of ECCV 2004 went smoothly thanks to the efforts of the organizing committee the area chairs the program committee and the reviewers We are indebted to Anders Heyden Mads Nielsen and Henrik J Nielsen for passing on ECCV traditions and to Dominique Asselineau from ENST TSI who kindly provided his GestRFIA conference software We thank Jan Olof Eklundh and Andrew Zisserman for encouraging us to organize ECCV 2004 in Prague
