### Running Finale

#### System Requirements

Windows 8/8.1/10 (64-bit only), 4 GB RAM minimum, 1280x800 minimum monitor resolution (high resolution displays not currently supported), High-speed Internet connection required for download, authorization, updates, and help resources, 1 GB hard drive space required for software with an additional 8 GB required for Garritan Instruments for Finale, ASIO, DirectSound, or WASAPI audio supported.

The system requirements listed are current as of release but are subject to change. Visit [www.finalemusic.com/system-requirements](http://www.finalemusic.com/system-requirements) to see the most up-to-date system requirements.

#### Installing Finale

If any previous version of Finale has been installed on the machine, Finale recommends that you restart your computer and log on as System Administrator before installing. This will prevent erroneous font warnings.

We recommend that you install Finale, and any other software, when logged in as System Administrator.

If you encounter problems during installation, we recommend that you do the following:

1. Turn off any programs running in the background. Virus detectors can often prevent Finale from installing necessary files and updating the registry. Rest assured, your Finale installer does not contain any viruses.
2. Press CTRL+SHIFT+ESC to open the Task Manager. Click on the **Details** tab (if this tab is not visible, click **More details**). In the **Details** tab, click **User name** to sort the running programs by user ID name. This lists every process that is running on the system.
3. Under the **User name** column, look at all of the processes in the **Name** column associated with your account name. Right-click each one, choose **End task**, and click **End process**. Do this for every process assigned to your name except **Taskmgr.exe**, **explorer.exe**, and **System Idle Process**.
4. Close the Task Manager.
5. Check your system tray (lower-right corner of the screen) for any running programs, especially antivirus software, which can interfere with proper installation of programs. Right-click each and choose **Quit**.
