[Living with AI: Practical Tools for Beginners](#) Jeffery Long,2024-08-23 Living with AI Practical Tools for Beginners Chapter 1 Introduction to AI Artificial Intelligence commonly referred to as AI is a branch of computer science that focuses on creating systems capable of performing tasks that would typically require human intelligence These tasks include problem solving understanding natural language recognizing patterns and making decisions At its core AI aims to develop machines that can mimic cognitive functions associated with the human mind This technology has evolved over the decades transitioning from theoretical concepts to practical applications that impact our daily lives One

of the fundamental building blocks of AI is machine learning which allows computers to learn from data and improve their performance over time without being explicitly programmed This process involves feeding large amounts of data into algorithms which then identify patterns and make predictions based on that information For instance recommendation systems on streaming platforms analyze user behavior to suggest movies or shows that align with individual preferences This capability underscores how AI can enhance user experiences by personalizing interactions AI and Creative Writing Graeme Harper,2026-01-01 AI and Creative Writing explores the transformations risks and possibilities that are brought about by the interaction of artificial intelligence and creative writing Offering a variety of opinions and thoughts this book directly considers AI s impact on our creative writing practices More generally it references the impact of AI on types of human knowledge and varieties of human understanding The focus is on what currently is as well as on what is emerging while the wider context is the emergence of AI over time especially since World War II noting particularly the work of Alan Turing AI in relation to creative writing refers mostly to the training of Large Language Models LLMs that is to the use of chatbots such as ChatGPT This collection however is not so much concerned with specific chatbots The discussion here is far more about our actions reactions and expectations focusing on the ways in which AI and creative writing communicate and might in the future communicate and why and to what ends The result is a stimulating guide to what might or might not be on the horizon for AI s impact on creative writing Rethinking Writing Education in the Age of Generative AI Chaoran Wang,Zhongfeng Tian,2025-05-23 Bringing together leading scholars and practitioners Rethinking Writing Education in the Age of Generative AI offers a timely exploration of pressing issues in writing pedagogies within an increasingly AI mediated educational landscape From conceptual and empirical work to theory guided praxis the book situates the challenges we face today within the historical evolution of writing education and our evolving relationship with AI technologies Covering a range of contexts such as L2 multilingual writing first year writing writing centers and writing program administration and faculty development the book examines various AI informed writing pedagogies and practices Drawing on interdisciplinary perspectives from writing studies education and applied linguistics the book bridges theory and practice to address critical questions of innovation ethics and equity in AI supported teaching This book is essential for writing educators and researchers looking to leverage AIs to facilitate the teaching and learning of writing in critical and transformative ways
