What is Emotion? Daniel and Amy Starch Research Professor of Psychology Emeritus Jerome Kagan,Jerome Kagan,2007-01-01 In this sophisticated overview of human emotions a widely respected psychologist and author addresses the ambiguities and embraces the controversies that surround this intriguing subject An insightful and lucid thinker Jerome Kagan examines what exactly we do know about emotions which popular assumptions about emotions are incorrect and how scientific study must proceed if we are to uncover the answers to persistent and evasive questions about emotions Integrating the findings of anthropological psychological and biological studies in his wide ranging discussion Kagan explores the evidence for great variation in the frequency and intensity of emotion among different cultures He also discusses variations among individuals within the same culture and the influences of gender class ethnicity and temperament on a person's emotional patina In his closing chapter the author proposes that three sources of evidence verbal descriptions of feelings behaviours and measures of brain states provide legitimate but different definitions of emotion Translating data from one of these sources to another may not be possible Kagan warns and those who study emotions must accept at least for now that their understanding is limited to and by the domain of their information

Human Emotions Jonathan H. Turner,2007 This major theoretical work takes existing work on the emotions in significantly new directions It gives a comprehensive account of emotions beginning with general sociological principles moving over important theory construction of social formation and applying this to a detailed and unified grand theory of human emotions Presenting a unified view of the emotions in the social universe the book explores the relationships between emotions social structure and culture Turner hypothesises how social structure and culture affect emotional arousal in humans and vice versa This book is essential reading for undergraduate and postgraduate students researching sociology of emotions social psychology and contemporary social theory and is also relevant for students and researchers working in the fields of psychology and cultural studies

Human Emotions Jennifer M. Jenkins, Keith Oatley, Nancy Stein, 1998-06-08 *Human Emotions: A Reader* brings together a collection of articles which give an approach to

the fast growing field of empirical and theoretical research on emotions The volume includes classic writings from Darwin James and Freud chosen to show their current significance together with articles from contemporary research literature The articles give a broad coverage of the subject and include selections from cross cultural biological social developmental and clinical areas of study Human Emotions A Reader begins with an overall introduction to both the volume and subject area by the Editors Each of the six sections of the book and each article are introduced contextualizing and relating these articles to comparable research The volume is organized to correspond with the structure and coverage of Understanding Emotions written by Keith Oatley and Jennifer M Jenkins also published by Blackwell It can also be used independently allowing instructors to teach courses on emotions with their own emphases and giving students access to a range of primary source material in this thought provoking field

On the Origins of Human Emotions Jonathan Turner,2000-06-01 Language and culture are often seen as unique characteristics of human beings In this book the author argues that our ability to use a wide array of emotions evolved long before spoken language and in fact constituted a preadaptation for the speech and culture that developed among later hominids Long before humans could speak with words they communicated through body language their emotional dispositions and it is the neurological wiring of the brain for these emotional languages that represented the key evolutionary breakthrough for our species How did natural selection work on the basic ape anatomy and neuroanatomy to create the hominid line The author suggests that what distinguished our ancestors from other apes was the development of an increased capacity for sociality and organization crucial for survival on the African savanna All apes display a propensity for weak ties individualism mobility and autonomy that was and is today useful in arboreal and woodland habitats but served them poorly when our ancestors began to move onto the African plain during the late Miocene The challenge for natural selection was to enhance traits in the species that would foster the social ties necessary for survival in the new environment The author suggests that the result was a development of certain areas of the primate brain that encouraged strong emotional ties allowing our ancestors to build higher levels of social solidarity Our basic neurological wiring continues to reflect this adaptive development From a sociological perspective that is informed by evolutionary biology primatology and neurology the book examines the current neurological bases of our emotional repertoire and their implications for our social actions

Comparative Perspectives explicitly puts him in dialogue with major Western philosophers The Dao Companion to the Philosophy of Mencius serves as an essential volume for college students graduate students and scholars who study and teach Mencius as well as Chinese philosophy and comparative philosophy in general **Human Emotions** Carroll E. Izard,2013-08-22 In recent years especially the past decade in sharp contrast to preceding decades knowledge in the field of emotions has been steadily increasing This knowledge comes from many different specialties Emotion is a truly interdisciplinary subject Workers in the fields of physiology neurology ethology physiological psychology personality and social psychology clinical psychology and psychiatry medicine nursing social work and the clergy are all directly concerned with emotion Professions such as law and architecture have an obvious concern with emotions as they affect human motives and needs The various branches of art especially the performing arts certainly deal with the emotions especially with the expression of emotions Constantine Stanislavsky the Russian theatrical genius revolutionized modern theater by developing a training method for actors and actresses that emphasized creating genuine emotion on the stage the emotion appropriate to the character and the life situation being depicted Indeed one can hardly think of any human activity that is not related in some way to the field of emotion Since the contributions to the subject of emotions come from so many different disciplines it is difficult to find the important common themes that can yield an understanding of the field as a whole This volume will attempt to make that task easier but I recognize that no one can treat all of the diverse material expertly and in detail My aim will be to represent all important types of contributions and perhaps point the way for further and more intensive study of special topics **We Feel Fine** Sep Kamvar,Jonathan Harris,2009-12 Armed with custom software that scours the English speaking world s new Internet blog posts every minute hunting down the phrases I feel and I am feeling the authors have collected over 12 million feelings since 2005 amassing an ever growing database of human emotion that adds more than 10 000 new feelings a day Equal parts pop culture and psychology computer science and conceptual art sociology and storytelling this is no ordinary book with thousands of authors from all over the world sharing their uncensored emotions it is a radical experiment in mass authorship merging the online and offline worlds to create an indispensable handbook for anyone interested in what it s like to be human **The Emotions of Jesus** Robert Law,1915 **Human Emotions** Raymond Albert Launier,1979 *The Anatomy of Emotion* Edward William Lazell,1929 **Feelings** David Scruton,2011-03 There is no life without emotion Our emotions are as real as anything about us This is a truth to which each of us can testify from our own lives Is anything more real than Fear Hope Joy Anger Despair Love But what are they They affect us but how do they do this What are they for Emotions are not objects We can t put Anger on a slide and examine it under a microscope We are unable to grow a culture of Joy in a petri dish of chicken broth We cannot determine the chemical formula of Despair We can t measure the protein content of Jealousy or isolate the DNA of Love But we can learn about the nature function and performance of emotions what they are and what they are not and how we as individual human beings can exert some

measure of influence over our own emotion experiences Life is all about emotions positive versus negative human versus non human false versus real Here you will learn about yourself and what makes you tick an emotional journey you ll soon discover is worth the taking About the Author David Scruton is a Professor Emeritus of Anthropology who taught for thirty five years He has been engaged in academic writing for the past fifty years and is the author of Sociophobics the Anthropology of Fear Scruton who makes his home in Golden Colorado is currently engaged in a work of fiction which he describes as a romantic thriller Publisher s website <http://www.strategicpublishinggroup.com> title Feelings AnAnthropologistLooksAtHumanEmotions htm

The Psychology of Emotions Carroll E. Izard,1991-10-31 Emotions are a part of personality and essential to all human relationships but how well do we understand what they really are What are the processes by which they occur and influence us How do they affect the way we perceive and interact with the world In The Psychology of Emotions author Carroll E Izard provides a timely overview that focuses on the relevance of emotions to our daily lives as he addresses these and other fundamental questions on the activation expression experience and functions of emotions

The Evolution of Emotion Paul F. Kisak,2016-04-29 The study of the evolution of emotions dates back to the 19th century and has come to be known as sensusology Evolution and natural selection has been applied to the study of human communication mainly by Charles Darwin in his 1872 work The Expression of the Emotions in Man and Animals Darwin researched the expression of emotions in an effort to support his theory of evolution He proposed that much like other traits found in animals emotions also evolved and were adapted over time His work looked at not only facial expressions in animals and specifically humans but attempted to point out parallels between behaviors in humans and other animals According to modern evolutionary theory different emotions evolved at different times Primal emotions such as fear are associated with ancient parts of the brain and presumably evolved among our premammal ancestors Filial emotions such as a human mother s love for her offspring seem to have evolved among early mammals Social emotions such as guilt and pride evolved among social primates Sometimes a more recently evolved part of the brain moderates an older part of the brain such as when the cortex moderates the amygdala s fear response Evolutionary psychologists consider human emotions to be best adapted to the life our ancestors led in nomadic foraging bands

Adopting the Song of Appearance: An Emotional Symphony within **Human Emotions**

In a world used by displays and the ceaseless chatter of instantaneous connection, the melodic splendor and mental symphony developed by the published word frequently diminish into the backdrop, eclipsed by the relentless sound and interruptions that permeate our lives. Nevertheless, nestled within the pages of **Human Emotions** a stunning literary value overflowing with organic feelings, lies an immersive symphony waiting to be embraced. Crafted by a masterful composer of language, that captivating masterpiece conducts visitors on an emotional trip, skillfully unraveling the hidden melodies and profound affect resonating within each cautiously crafted phrase. Within the depths of this touching review, we shall investigate the book's main harmonies, analyze their enthralling publishing type, and surrender ourselves to the profound resonance that echoes in the depths of readers' souls.
