

Sleep hygiene

Sleep hygiene refers to good sleep habits. The following are some ways of establishing and maintaining healthy sleep routines, and can provide long-term solutions to sleep difficulties:

Routines

Teach your body to get ready for sleep

- Go to bed and get up at regular times
- Develop a personal, relaxing, pre-bed routine e.g. stretching or breathing exercises
- A hot bath 1-2 hours before bed or a warm glass of milk can help
- Teach your body to link 'bed' with 'sleeping' - avoid using the bed to eat, work, read, or use electronic devices

Environment

Are your surroundings suitable for sleep?

- A cooler room with enough blankets for warmth is best
- Use heavy curtains/blinds, an eyemask and/or earplugs to block out light and noise

Diet, exercise and napping

What you do in the day impacts your sleep at night

- Avoid naps, or restrict naps to less than 1 hour before 3pm
- Avoid caffeine, nicotine, and alcohol at least 4-6 hours before bed
- Avoid looking at bright screens (e.g. phone, tablet) 2-3 hours before bed
- Exercise regularly but avoid strenuous exercise within 4 hours of bedtime
- Maintain a balanced diet but avoid a large meal soon before bed

Reactions

How we respond to poor night's sleep can help make or break a poor sleep cycle

- If you can't fall asleep after about 20 minutes, get up, do a calm or boring activity until you feel sleepy, then return to bed
- Avoid frequently checking the clock at night
- Try to do everything you had planned for the day, even if you slept poorly the night before
