Fasting and Feasting Adam Federman, 2017-08-23 Of all my culinary heroes Patience Gray was the most magical Adam Federman's beautifully considered and well researched biography shines a bright light on Gray's complicated surprising and gutsy life Alice Waters owner Chez Panisse author of *The Art of Simple Food* A New York Times Notable Book for 2017 Now in Paperback For more than thirty years Patience Gray author of the celebrated cookbook *Honey from a Weed* lived in a remote area of Puglia in southernmost Italy She lived without electricity modern plumbing or a telephone grew much of her own food and gathered and ate wild plants alongside her neighbors in this economically impoverished region She was fond of saying that she wrote only for herself and her friends yet her growing reputation brought a steady stream of international visitors to her door This simple and isolated life she chose for herself may help explain her relative obscurity when compared to the other great food writers of her time M F K Fisher Elizabeth David and Julia Child So it is not surprising that when Gray died in 2005 the BBC described her as an almost forgotten culinary star Yet her influence particularly among chefs and other food writers has had a lasting and profound effect on the way we view and celebrate good food and regional cuisines Gray's prescience was unrivaled She wrote about what today we would call the Slow Food movement from foraging to eating locally long before it became part of the cultural mainstream Imagine if Michael Pollan or Barbara Kingsolver had spent several decades living among Italian Greek and Catalan peasants recording their recipes and the significance of food and food gathering to their way of life In *Fasting and Feasting* biographer Adam Federman tells the remarkable and until now untold life story of Patience Gray from her privileged and intellectual upbringing in England to her trials as a single mother during World War II to her career working as a designer editor translator and author and describing her travels and culinary adventures in later years A fascinating and spirited woman Patience Gray was very much a part of her times but very clearly ahead of them

Taste, Memory David Buchanan, 2012-10-25 *Taste Memory* traces the experiences of modern day explorers who rediscover culturally rich forgotten foods and return them to our tables for all to experience and savor In *Taste Memory* author David Buchanan explores questions fundamental to the future of food and farming How can we strike a balance between preserving the past maintaining valuable agricultural and culinary traditions and looking ahead to breed new plants What place does a cantankerous old pear or too delicate strawberry deserve in our gardens farms and markets To what extent should growers value efficiency and uniformity over matters of taste ecology or regional identity While living in Washington State in the early nineties Buchanan learned about the heritage food movement and began growing fruit trees grains and vegetables After moving home to New England however he left behind his plant collection and for several years

stopped gardening In 2005 inspired by the revival of interest in regional food and culinary traditions Buchanan borrowed a few rows of growing space at a farm near his home in Portland Maine where he resumed collecting By 2012 he had expanded to two acres started a nursery and small business and discovered creative ways to preserve rare foods In Taste Memory Buchanan shares stories of slightly obsessive urban gardeners preservationists environmentalists farmers and passionate cooks and weaves anecdotes of his personal journey with profiles of leaders in the movement to defend agricultural biodiversity Taste Memory begins and ends with a simple premise that a healthy food system depends on matching diverse plants and animals to the demands of land and climate In this sense of place lies the true meaning of local food *The LDN Book* Linda Elsegood,2016-02-15 Could a little known drug really revolutionize treatment for autoimmune diseases cancer depression and more LDN raises hopes of reversing memory loss in old age the Guardian Over 30 000 copies sold Low Dose Naltrexone LDN holds the potential to help millions of people suffering from various autoimmune diseases and cancers and even autism chronic fatigue and depression find relief Administered off label in small daily doses 0.5 to 4.5 mg this generic drug is extremely affordable and presents few known side effects So why has it languished in relative medical obscurity The LDN Book explains The drug s origins Its primary mechanism The latest research from practicing physicians and pharmacists Compiled by Linda Elsegood of The LDN Research Trust the world s largest LDN charity organization with over 19 000 members worldwide the book features ten chapters contributed by medical professionals on LDN s efficacy and two patient friendly appendices The LDN Book is a comprehensive resource for doctors pharmacists and patients who want to learn more about how LDN is helping people now and a clarion call for further research that could help millions more **Your Baby's Microbiome** Toni Harman,Alex Wakeford,2017-02-23 From the Directors of the Award Winning Documentary Microbirth At least two amazing events happen during childbirth There s the obvious main event which is the emergence of a new human into the world But there s another event taking place simultaneously a crucial event that is not visible to the naked eye an event that could determine the lifelong health of the baby This is the seeding of the baby s microbiome the community of good bacteria that we carry with us throughout our lives The seeding of the microbiome along with breastfeeding and skin to skin contact kick starts the baby s immune system and helps protect the infant from disease across a lifetime Researchers are discovering however that interventions such as the use of synthetic oxytocin antibiotics C sections and formula feeding interfere with or bypass completely the microbial transfer from mother to baby These bacteria are vital for human health and science has linked an imbalance in the human microbiome with multiple chronic diseases Drawing on the extensive research they carried out for their documentary film Microbirth authors Toni Harman and Alex Wakeford reveal a fascinating new view of birth and how microscopic happenings can have lifelong consequences for ourselves our children and our species as a whole **Fasting and Feasting (UK Edition)** Adam Federman,2017-06-07 Patience Gray emerges from this life as an utterly original spirit who was one of the few to rebel against the change in direction that eating had taken in modern times
