1) what are static blocks and static initalizers in Java ?

Static blocks or static initializers are used to initalize static fields in java. we declare static blocks when we want to intialize static fields in our class. Static blocks gets executed exactly once when the class is loaded . Static blocks are executed even before the constructors are executed.

2) How to call one constructor from the other constructor ?

With in the same class if we want to call one constructor from other we use this() method. Based on the number of parameters we pass appropriate this() method is called.
Restrictions for using this method :
1) this must be the first statement in the constructor
2)we cannot use two this() methods in the constructor

3) What is method overriding in java ?

If we have methods with same signature (same name, same signature, same return type) in super class and subclass then we say
subclass method is overridden by superclass.
When to use overriding in java
If we want same method with different behaviour in superclass and subclass then we go for overriding.
When we call overridden method with subclass reference subclass method is called hiding the superclass method.

4) What is super keyword in java ?

Variables and methods of super class can be overridden in subclass . In case of overriding , a subclass object call its own variables and methods. Subclass cannot access the variables and methods of superclass because the overridden variables or methods hides the methods and variables of super class. But still java provides a way to access super class members even if its members are overridden. Super is used to access superclass variables, methods, constructors.
Super can be used in two forms :
1)   First form is for calling super class constructor.
2)   Second one is to call super class variables,methods.
Super if present must be the first statement.

5) Difference between method overloading and method overriding in java ?

Method Overloading	Method Overriding
1) Method Overloading occurs with in the same class	Method Overriding occurs between two classes superclass and subclass
2) Since it involves with only one class inheritance is not involved.	Since method overriding occurs between superclass and subclass inheritance is involved.
3)In overloading return type need not be the same	3) In overriding return type must be same.
4) Parameters must be different when we do overloading	4) Parameters must be same.
5) Static polymorphism can be acheived using method overloading	5) Dynamic polymorphism can be acheived using method overriding.
6) In overloading one method can't hide the another	6) In overriding subclass method hides that of the superclass method.

Parties and Parliaments in Southeast Asia Roland Rich,2014-06-23 Political parties are an essential ingredient in a modern democracy They are also seen as the least trusted and most problematic institution in most democratic systems While there have been attempts to strengthen parties through institutional design and capacity building a new strategy has been to quarantine them from parts of parliament Within the space of a few years the Philippines Thailand and Indonesia implemented designs for parliamentary representation that proscribed the established political parties from a parliamentary chamber or part thereof Using these three countries as case studies this book traces the historical context for institutional designs the intentions behind them and their implementation through at least one full parliamentary term It investigates the conceptual architecture of the non partisan designs identifying corporatism as one discredited alternative and championship as another While there is a yearning for exemplary people as representatives the designers have struggled to find a successful means of having these champions elected to office The book concludes that non partisan chambers based on the evidence to date are not viable This book is of interest to scholars of Southeast Asian Politics Party Politics Governance Institutions and Democracy **Computerworld** ,1996-07-15 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network *Commerce Business Daily* ,2000-04 125 Multiple-Choice Questions in Java Maria Litvin,Gary Litvin,2003-04-01 5 timed tests each offering 25 challenging multiple choice questions The questions mostly stay within the range of the standard AP CS curriculum Automotive News ,2007 **JAVA MCQ BRAIN TEASER** Rakesh Singh,2021-10-18 50 Tricky MCQs Uniquely Crafted from Real Interviews The Java MCQ brain teaser is uniquely crafted from hundreds of real face to face interviews to discover your true skills and gain confidence The tricky multiple choice questions are based on multiple topics on core java OOP threads exceptions and collections etc with very detailed explanations with code examples for your easy understanding IMPORTANT 1 If you know the basic concepts you ll be able to answer or else you need a serious improvement for your career growth 2 Answer each question with reasons to get maximum benefits Start gaining confidence with these brain teasing Java MCQs NOW *Java Interview Questions* Ue Kiao,Aditya
