Artificial Intelligence in Recruiting. A Literature Review on Artificial Intelligence Technologies, Ethical Implications and the Resulting Chances and Risks Matthias Rudolph, 2021-01-07 Master s Thesis from the year 2020 in the subject Computer Sciences Artificial Intelligence grade 1 3 Friedrich Alexander University Erlangen Nuremberg Wirtschaftsinformatik language English abstract The thesis aims to analyze this field of tension between the benefits and risks caused by the introduction of AI into recruiting based on a systematic analysis of academic publications To the knowledge of the author neither a literature review on ethical

challenges of AI based recruiting tools nor an overview addressing application fields and the resulting ethical risks has been published so far Consequently this thesis aims to close this research gap by disclosing how AI technologies affect the recruiting process and how ethical challenges arising from the implementation of AI based tools are addressed in the same publications Consequently research question RQ one RQ1 and RQ two RQ2 can be derived Which AI technologies are applied in the field of recruiting and how do they influence the recruiting process Which major ethical challenges arise from the introduction of AI into recruiting and how are these challenges addressed by the proposed AI based tools Addressing these two RQs the remainder of this thesis is structured as follows Chapter 2 classifies recruiting and its subprocesses as a part of Human Resources HR establishes a common understanding of AI and machine learning ML algorithms relevant in AI based recruiting tools and derives major ethical challenges with a focus on the ethical principles fairness and transparency In chapter 3 the methodical approach used for identifying and selecting relevant literature is described Chapter 4 answers both RQs based on the AI based recruiting tools included in the literature set In turn the first part of the analysis focuses on analyzing how the needs raised through traditional recruiting means are addressed by AI based recruiting tools also touching base on the underlying technologies The second part addresses if and where applicable how these publications incorporate fairness and transparency Subsequently chapter 5 discusses the main findings of the analysis of the literature set and provides implications for theory and practice followed by a brief conclusion and the outlining of limitations and future research fields in chapter 6

Educating Disabled People for the 21st Century Edward J. Cain, Florence M. Taber, 1987 Journey of Homo sapiens From the Stone Age to AI SURYAMANI MISHRA, The human journey from the Stone Age to AI is an awe inspiring tale of innovation discovery and progress Here's an overview of the key milestones in this remarkable journey

- 1 The Stone Age circa 2.5 million years ago to 3000 BCE The Dawn of Tool Use Early humans homo habilis began using basic tools made from stone to hunt gather and protect themselves This marked the first significant shift in human evolution Fire Control Mastery over fire provided warmth a means to cook food and protection from predators Cave Paintings and Symbolism Evidence of early art and symbolic thinking emerged showing the beginnings of culture communication and abstract thought
- 2 Agricultural Revolution circa 10,000 BCE Domestication of Plants and Animals Humans shifted from a nomadic lifestyle to settled farming leading to the rise of permanent communities and the development of cities Technological Innovations Tools such as plows and irrigation systems were developed leading to more efficient farming and population growth Social Structures As societies grew complex social structures and early forms of government and trade began to form
- 3 The Bronze and Iron Ages circa 3300 BCE to 500 BCE Metallurgy The discovery and use of metals like bronze and iron revolutionized tools weapons and construction Writing Systems Early writing systems like cuneiform in Mesopotamia and hieroglyphs in Egypt emerged enabling the recording of information and the expansion of knowledge Trade and Warfare Advances in transportation and military technology led to increased trade cultural exchange and territorial conflicts
- 4 Classical and Medieval Eras circa 500 BCE to 1500 CE Philosophy and Science Philosophers like Aristotle and Plato and scientists like Archimedes laid the foundations for logical thinking mathematics and early scientific inquiry Invention of the Wheel and Printing Press The wheel revolutionized transport and the printing press invented by Gutenberg in the 15th century helped spread knowledge contributing to the Renaissance Scientific Advancements Breakthroughs in astronomy medicine and engineering including the works of figures like Galileo and Leonardo da Vinci

[Handbook of Social Interactions in the 21st Century](#) Anne T. Heatherton,Vivian A.
