Draw Islamic Geometric Star Patterns Eric Broug , 2014-10-07 Learn how to draw seven geometric star patterns from around the Islamic world using only a pencil straight edge and a pair of compasses Patterns featured are from Baghdad Fes Cairo Konya Delhi and Damascus Suitable for ages 9 and up No calculations are necessary The least complicated way of learning Islamic geometric design is to understand and use the same techniques that craftsmen in the Islamic world have used for centuries These craftsmen were not mathematicians they knew how to make things with their hands but they did not use measurements or calculate angles to make their compositions Their tools were a pair of compasses a ruler and a pencil By drawing lines circles and arcs they were able to make all their patterns and compositions This is also how you will be able to draw these patterns This book will teach you how to draw seven different star patterns All the patterns in this book can be made without calculations and measurements They can be made by hand or on a computer All you need to be able to do is draw circles and lines The tools you need if you are drawing by hand are a pair of compasses a ruler and pencils Each pattern is constructed in a step by step

process

Symmetries of Islamic Geometrical Patterns S. J. Abas, Amer Shaker Salman, 1995 a major contribution to the world of science and of particular value to the documentation of the culture of Islam N Gedal a masterly account of the way in which art and science are combined into aesthetic beauty by the Islamic geometric designs and motifs which decorate much of the Eastern World M Evans This book will allow readers to travel through time and space from ancient ornaments to the most modern computer graphics patterns C Pickover Ever since the discovery of the existence of seventeen space groups in two dimensions by Fedorov in 1891 it has been speculated that all seventeen could be found in Islamic art But it is in this book that this remarkable fact is for the first time detailed and analysed with beautiful illustrations Rarely is there such a thought provoking blend of esthetics and geometry with abstraction C N Yang Geometrical form Here mathematics combines with art and exhibits clearly its aesthetic appeal Islamic patterns provide a marvellous illustration of symmetry and Drs Abas and Salman perform a useful service by taking this as their theme and blending it with ideas on computer graphics Foreword by Michael Atiyah Abas and Salman have assembled a fascinating collection that combines art history culture science mathematics and philosophy Their examples range from a 12th century minaret in Uzbekistan via the Alhambra in Granada to modern computer graphics of Koranic calligraphy on dodecahedrons and tori They conclude by speculating on the prospect of creating Islamic patterns in virtual reality where a seeker after unity in science and art would be able to submerge himself or herself in exquisite Alhambras of the mind Judging by the evidence presented here it would be an unforgettable experience New Scien
