Handbook for Teaching Introductory Psychology Michelle Rae Hebl, Charles L. Brewer, Ludy T. Benjamin, Jr., 2001-08-01 Like its predecessors Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom It contains an organized collection of articles from Teaching of Psychology TOP the official journal of the Society for the Teaching of Psychology Division 2 of the American Psychological Association Volume III contains 89 articles from TOP that have not been included in other volumes Another distinction between this volume and its predecessors is its emphasis on testing and assessment The book is divided into two sections Section One Issues and Approaches in Teaching Introductory Psychology contains 52 articles on critical issues such as how to approach the course understanding students interests perceptions and motives students existing knowledge of psychology including their misconceptions a comparison of introductory textbooks and tips on how to evaluate them test questions and student factors affecting exam performance an overview of different forms of feedback giving extra credit and how to deal with academic dishonesty Section Two consists of 37 articles that present demonstrations class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline This section is organized so as to parallel the order of topics found in most introductory psychology textbooks Intended for academicians who teach the introductory psychology course and or oversee grad assistants who teach the course all royalties of the book go directly to the Society for the

Teaching of Psychology to promote its activities to further improve the teaching of psychology **Statistics for the Behavioral Sciences** James Jaccard, Michael A. Becker, 2002 Now your students can become intelligent consumers of scientific research without being overwhelmed by the statistics Jaccard and Becker's text teaches students the basic skills for analyzing data and helps them become intelligent consumers of scientific information Praised for its real life applications the text tells students when to use a particular statistic why they should use it and how the statistic should be computed and interpreted Because many students given a set of data cannot determine where to begin in answering relevant research questions the authors explicate the issues involved in selecting a statistical test Each statistical technique is introduced by giving instances where the test is most typically applied followed by an interesting research example each example is taken from psychology literature

Psychologists on the March James H. Capshew, 1999-01-13 Why are there so many psychologists in America today Psychologists on the March seeks to answer this question through historical analysis of the middle years of this century The book argues that the Second World War exerted a profound influence on the shape and structure of the field transforming it from a small academic subject into an enormous mental health profession It provides a case study of the interaction of scientific expertise and professional practice in the construction of a modern discipline
