Neil Browne,Stuart M. Keeley,2013-12-01 **Asking Good Questions** Nancy A. Stanlick,Michael J.

Strawser,2015-03-05 Asking Good Questions moves beyond a traditional discussion of ethical theory focusing on how educators can use these important frameworks to facilitate critical thinking about real life ethical dilemmas In this way authors Nancy Stanlick and Michael Strawser offer students a theoretical tool kit for creatively addressing issues that influence their own environments This text begins with a discussion of key ethical theorists and then guides the reader through a series of original case studies and follow up activities that facilitate critical thinking emphasize asking thought provoking questions and teach the student to address the complexity of ethical dilemmas while incorporating the viewpoints of their peers Additionally Stanlick and Strawser include an extensive preface a mind mapping technique for analyzing and formulating arguments and a six step process for approaching complex real life moral issues Each chapter incorporates suggested assignments discussion questions and references for further reading and a guide for instructors offering a sample course schedule and suggestions on how to use this book effectively is also available This text is designed to help educators engage students in a meaningful discussion of how historical theories apply to their own lives providing rich and unique resources to learn about these critical issues *Pacific Seminar I 2007, University of the Pacific ,2007* **Instructor's Manual to Accompany The Art of Public Speaking, Seventh Edition** Stephen Lucas,2001 **Methods for Teaching** David A. Jacobsen,Paul D. Eggen,Donald P. Kauchak,2002 For K 12 general methods courses Methods for Teaching uses a three phase model of teaching planning implementing and assessing as a framework for fostering a success oriented K 12 environment by promoting student learning *The Legal Environment of Business Gac,1995-11* **Integrating Information Literacy Into the College Experience** Julia K. Nims,2003 **Handbook of Online Learning** Kjell Erik Rudestam,Judith Schoenholtz-Read,2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute s focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there s a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central

tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments **The Philosopher's Index** ,1987 Vols for 1969 include a section of abstracts
