The Epic Voice Alan D. Hodder, Robert E. Meagher, 2002-03-30 All five of the epics discussed in this volume came to serve as the basis for an ethnic and national tradition of history religion and literature documenting sometimes encyclopedically the crucially formative events of a people's early collective experience A sequential study of these stories will invite and provoke comparative questions and discussions of similar or parallel images episodes cultural values narrative strategies and poetic forms Of the five works discussed herein the Mesopotamian Epic of Gilgamesh the Hebrew David Story from 1 and 2 Samuel and 1 Kings the Greek Odyssey of Homer the Indian Ramayana of Valmiki and the Irish T in B C ailnge only the Odyssey conforms precisely to the classical Western conception of the epic but much is to be gained by considering these several ancient narratives collectively as parts of a composite human whole All are set in a time of historical beginnings when acts of bravery violence and conquest proved instrumental in the formation of a people and the shaping of a nation All recount the exploits of a hero or heroes whose triumphs and failings prove to have a decisive impact on the destiny of an age and a culture All reflect an entrenched culture of warriors and kings whose acts of heroism and prowess on the battlefield become the subjects of song and celebration for a people just beginning to take stock of their historical cultural and religious heritage In cultures wherein literacy was rare books even rarer mass media nonexistent and entertainment few hunger for and delight in stories must have been common and intense The oldest of the stories discussed in this collection Gilgamesh dates back almost five thousand years yet it and the others still resonate with modern readers There is much pleasure to be had in discovering the common themes these epics share and in realizing that they are stories as much for today as for yesterday

The Riddle of Resurrection Tryggve N. D. Mettinger, 2001

Mesopotamian Planetary Astronomy-astrology David Brown, 2000 Pliny wrote of Babylon that here the creator of the science of astronomy was Excavations have shown this statement to be true This book argues that the earliest attempts at the accurate prediction of celestial phenomena are indeed to be found in clay tablets dating to the 8th and 7th centuries BC from both Babylon and from Nineveh The author carefully situates this astronomy within its cultural context treating all available material from the relevant period and also analysing the earlier astrological material and the later well known

ephemerides and related texts A wholly new approach to cuneiform astral concerns emerges one in which both celestial divination and the later astronomy are shown to be embedded in a prevailing philosophy dealing with the ideal nature of the early universe and in which the dynamics of the celestial divination industry that surrounded the last Assyrian monarchs account for no less than the first recorded scientific revolution This work closely adheres to the original textual sources and argues for the evolution on the basis of the needs of the ancient scholars and the internal logic of the divinatory and predictive systems employed To this end it offers for the first time a Mesopotamian contribution to the philosophy and not only the history of science 1951, □□□□□□□□ *The Assyrian Sacred Tree* Mariana Giovino,2007 Revised thesis doctoral University of Michigan Ann Arbor 2004
