

Standard Specification for Rigid Poly(Vinyl Chloride) (PVC) Exterior-Profile Extrusions Used for Assembled Windows and Doors¹

This standard is issued under the fixed designation D4726; the number immediately following the designation indicates the year of original adoption or, in the case of revisions, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope*

1.1 This specification establishes requirements for the material properties, including dimensional stability, weatherability, and extrusion quality, of rigid poly(vinyl chloride) (PVC) exterior profile extrusions used for assembled windows and doors. Methods for testing and for identifying exterior profile extrusions that comply with this specification are also provided.

1.2 The use of rigid PVC recycled plastic in this product shall be in accordance with the requirements in Section 6.

Note 1—Information with regard to application, assembly, and installation should be obtained from the manufacturers of the profiles and of the windows and doors.

Note 2—Refer to Specification D1678 for interior profile extrusions.

1.3 Color-hold guidelines are provided in an appendix for the manufacturer's product development and quality performance use.

1.4 Color-hold guidelines are presently limited to white, grey, beige, light brown, and dark brown (see Figs. X1.1 through X1.5). Additional colors will be added as color guidelines are developed.

1.5 The values stated in inch-pound units are to be regarded as standard. The values given in parentheses are for information only.

Note 3—There is no known ISO equivalent to this standard.

1.6 The text of this standard references notes and footnotes, which provide explanatory material. These notes and footnotes (excluding those in tables and figures) shall not be considered as requirements of this standard.

1.7 The following safety hazards caveat pertains only to the test methods portion, Section 11, of this specification: *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety, health, and*

environmental practices and determine the applicability of regulatory limitations prior to use.

1.8 This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations (issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee).

PVC Plastics W. V. Titow, 2012-12-06 This book originated from my Publisher's request for a new concise account of PVC plastics in terms of their nature properties processing and applications There is thus inevitably an extensive thematic overlap with my still relatively recent *PVC Technology* 4th edition and I have drawn liberally on that source for a substantial amount of relevant basic material However the present book is by no means merely an abridgement of the earlier one whilst indeed considerably shorter it is not only comparable in scope and general coverage of the subject but also contains much new information I have made a point of again strongly featuring the numerous standards relevant and in many cases cardinal to the testing and characterisation of PVC materials and products and to the evaluation of their properties and performance these standards are an indispensable part of the technology of PVC plastics and nobody concerned with any aspect of this complex subject should fail to recognise that fact It is ever a pleasure to express appreciation and thanks where they are due I am grateful to Dipl Ing H E Luben of Brabender OHG Duisburg FRG not only for the up to date information he provided on Brabender equipment but also most particularly for his exceptionally friendly helpful attitude in all our contacts and for the trouble he took to make some illustrations and figures available in the form convenient for direct reproduction *Annual Book of ASTM Standards* ASTM International, American Society for Testing and Materials, 2003 **Annual Book of ASTM Standards** American Society for Testing and Materials, 1992 **ASTM Standardization News** American Society for Testing and Materials, 1995 *Standardization News* American Society for Testing and Materials, 2002 **Specifications & Standards for Plastics & Composites** Frank T. Titow, 1998-08-21 The 20th Century World has been transformed by the discovery and use of plastics Today plastic materials are used in a wide variety of applications from building and construction to packaging from sports equipment to transportation The vast number of plastics materials discovered over the past 40 years and their wide range of properties make them uniquely suited to a very broad spectrum of applications This combination of the successful utilisation of the materials and the number of types of material available has led to the growth of an array of technical terms within the field The Dictionary is intended as a reference tool for readers to negotiate these terms The main part of the *Technical Dictionary of Plastics Materials* presents a comprehensive set of

extended definitions of technical terms relating to all facts of the materials aspect of plastics technology The definitions cover the nature of plastics materials their composition including relevant non polymeric components and additives such as stabilisers fillers colourants etc their properties including methods of property determination testing and evaluation their applications and their handling and behaviour in processing In many cases reference is given to the relevant technical standards from the International ISO British BSI and American ASTM standards In addition to the main part of the Dictionary containing the definitions there are two further sections The first gives explanations of the abbreviated terms letter symbols used for the parent polymer and for the other constituents of plastics materials while the second identifies the trade names of a number of plastics materials and their components
