Audio Culture, Revised Edition Christoph Cox, Daniel Warner, 2017-07-27 The groundbreaking Audio Culture Readings in Modern Music Continuum September 2004 paperback original maps the aural and discursive terrain of vanguard music today Rather than offering a history of contemporary music Audio Culture traces the genealogy of current musical practices and theoretical concerns drawing lines of connection between recent musical production and earlier moments of sonic experimentation It aims to foreground the various rewirings of musical composition and performance that have taken place in the past few decades and to provide a critical and theoretical language for this new audio culture This new and expanded edition of the Audio Culture contains twenty five additional essays including four newly commissioned pieces Taken as a whole the book explores the interconnections among such forms as minimalism indeterminacy musique concr te free improvisation experimental music avant rock dub reggae ambient music hip hop and techno via writings by philosophers cultural theorists and composers Instead of focusing on some crossover between high art and popular culture Audio Culture takes all these musics as experimental practices on par with and linked to one another While cultural studies has tended to look at music primarily popular music from a sociological perspective the concern here is philosophical musical and historical Audio Culture includes writing by some of the most important musical thinkers of the past half century among them John Cage Brian Eno Ornette Coleman Pauline Oliveros Maryanne Amacher Glenn Gould Umberto Eco Jacques Attali Simon Reynolds Eliane Radigue David Toop John Zorn Karlheinz Stockhausen and many others Each essay has its own short introduction helping the reader to place the essay within musical historical and conceptual contexts and the volume concludes with a glossary a timeline and an extensive discography

Music's Immanent Future Sally Macarthur, Judy Lochhead, Jennifer Shaw, 2016-05-12 The conversations generated by the chapters in Music's Immanent Future grapple with some of music's paradoxes that music of the Western art canon is viewed as timeless and universal while other kinds of music are seen as transitory and ephemeral that in order to make sense of music we need descriptive language that to open up the new in music we need to revisit the old that to arrive at a figuration of music itself we need to posit its starting point in noise that in order to justify our creative compositional works as research we need to find critical languages and theoretical frameworks with which to discuss them or that despite being an auditory system we are compelled to resort to the visual metaphor as a way of thinking about musical sounds Drawn to musical sound as a powerful form of non verbal communication the authors include musicologists philosophers music theorists ethnomusicologists and composers The chapters in this volume investigate and ask fundamental questions about how we think converse write about compose listen to and analyse music The work is informed by the philosophy primarily of Gilles Deleuze and Felix Guattari and secondarily of Michel Foucault Julia Kristeva and Jean Luc Nancy The chapters cover a wide range of topics focused on twentieth and twenty first century musics covering popular musics art music acousmatic music and electro acoustic musics and including

music analysis music's ontology the noise music dichotomy intertextuality and music listening ethnography and the current state of music studies The authors discuss their philosophical perspectives and methodologies of practice led research including their own creative work as a form of research Music's Immanent Future brings together empirical cultural philosophical and creative approaches that will be of interest to musicologists composers music analysts and music philosophers
