

Anti-Inflammatory Food Guide

The food we eat is one of the most powerful ways to fight inflammation because certain nutrients and compounds in food directly impact the body's inflammatory processes. Unlike medications, which may only target symptoms, food provides the building blocks for our cells, tissues, and immune responses, allowing us to address inflammation at a foundational level. Here is a list of foods that are effective in managing and preventing inflammation.

Turmeric

Contains curcumin, a polyphenol that inhibits the NF-kappaB pathway, COX-2 enzymes, and pro-inflammatory cytokines, reducing inflammation at the molecular level.

Salmon

Rich in omega-3 fatty acids (EPA and DHA) that produce anti-inflammatory lipid mediators, resolving inflammation and reducing pro-inflammatory cytokines.

Blueberries

High in anthocyanins, which inhibit pro-inflammatory pathways and oxidative stress, providing strong anti-inflammatory and antioxidant properties.

Avocado

Contains monounsaturated fats and polyhydroxylated fatty alcohols, exerting anti-inflammatory effects by modulating immune responses and reducing cytokine production.

Broccoli

Rich in sulforaphane, a compound that activates NRF2, a transcription factor that reduces inflammation by increasing antioxidant defense mechanisms.

Ginger

Gingerol, the active compound in ginger, suppresses inflammatory mediators and cytokines, providing anti-inflammatory and antioxidant effects.

Spinach

Abundant in vitamins (such as folate and vitamin K) and phytochemicals (like quercetin), providing anti-inflammatory effects by modulating immune responses and reducing oxidative stress.

Kale

High in antioxidants, including quercetin and kaempferol, known for their anti-inflammatory properties by reducing inflammation at the cellular level.

Olive Oil

Contains oleocanthal, a natural anti-inflammatory compound that inhibits COX enzymes similarly to ibuprofen, reducing inflammation.

Tomatoes

Rich in lycopene, an antioxidant with anti-inflammatory properties that inhibits inflammatory mediators and reduces oxidative stress.

Walnuts

Provide omega-3 fatty acids (ALA) and polyphenols, exerting anti-inflammatory effects by reducing pro-inflammatory cytokines and oxidative stress.

Dark Chocolate

Contains flavonoids with anti-inflammatory and antioxidant properties, inhibiting inflammatory pathways and reducing oxidative stress.

Flax Seeds

High in alpha-linolenic acid (ALA), an omega-3 fatty acid with anti-inflammatory effects by reducing pro-inflammatory cytokines and oxidative stress.

Green Tea

Epigallocatechin gallate (EGCG) in green tea has anti-inflammatory and antioxidant properties, inhibiting inflammatory signaling pathways and reducing oxidative stress.

Sweet Potatoes

Rich in beta-carotene, a precursor to vitamin A, known for its anti-inflammatory effects by modulating immune responses and reducing oxidative stress.

Health Breakthroughs 2025 Bottom Line Books,1992 **How Not to Age** Michael Greger, M.D., FACLM,2023-12-05 Instant New York Times Bestseller Uncover the evidence based science to slowing the effects of aging from the New York Times bestselling author of the How Not to Die series When Dr Michael Greger founder of

NutritionFacts.org dove into the top peer-reviewed anti-aging medical research; he realized that diet could regulate every one of the most promising strategies for combating the effects of aging. We don't need Big Pharma to keep us feeling young; we already have the tools. In *How Not to Age*, the internationally renowned physician and nutritionist breaks down the science of aging and chronic illness and explains how to help avoid the diseases most commonly encountered in our journeys through life. Physicians have long treated aging as a malady, but getting older does not have to mean getting sicker. There are eleven pathways for aging in our bodies, cells, and we can disrupt each of them. Processes like autophagy, the upcycling of unusable junk, can be boosted with spermidine, a compound found in tempeh, mushrooms, and wheat germ. Senescent "zombie" cells that spew inflammation and are linked to many age-related diseases may be cleared in part with quercetin-rich foods like onions, apples, and kale. And we can combat effects of aging without breaking the bank. Why spend a small fortune on vitamin C and nicotinamide facial serums when you can make your own for up to 2,000 times cheaper? Inspired by the dietary and lifestyle patterns of centenarians and residents of blue zone regions where people live the longest, Dr. Greger presents simple, accessible, and evidence-based methods to preserve the body functions that keep you feeling youthful, both physically and mentally. Brimming with expertise and actionable takeaways, *How Not to Age* lays out practical strategies for achieving ultimate longevity.
