*Eratosthenes and the Measurement of the Earth's Circumference (c.230 BC)* Christopher A. Matthew,2023-06-05

Eratosthenes and the Measurement of the Earth s Circumference c 230 BC is an innovative and thought provoking examination of one of the pivotal moments in the history of science This text analyses a debate that has been going on for more than 2 300 years over the accuracy of Eratosthenes experiment and calculations and puts to rest all prior theories that have come before This work engages with this long running debate by applying innovative and multi disciplinary methods such as linguistic analysis mathematical modelling satellite mapping archaeological investigation and historical examination that creates the first ever combined exploration of this important event in the history of astronomy **On Western**

**Influences and the Transformation of Chinese Academic Thought** Qing Zhang,2025-12-18 This book analyses the growth of disciplinary knowledge in modern China through Sino foreign cultural exchange It examines Western influences and the transformation of Chinese academic thought through modern scientific disciplines rather than mere westernization based on the nationality of knowledge Historically this transformation is not the unidirectional eastward dissemination of Western learning but the introduction of West learning into China with more active participation and choice by Chinese scholars This understanding of the historical process focuses more on the innovation of the medium of knowledge emphasizing the material and technological background of the dissemination of Western learning
