Antler

Antler New York just heard the pitches for pre-seed investment delivered in front of the investment committee by Sleuth and Marco Financial. Both teams exhibited unique combinations of quantitative and qualitative factors and different approaches to building a company. The Antler team was looking through all the insights from their time working with the entrepreneurs, and the startups they formed, over the last three months, to make the investment decisions. Beyond the current decision, Magnus Grimeland and Fridtjof Berge, Antler's founders, were wondering how the increasing amounts of data that were being generated about entrepreneurs and their interactions on the Antler platform could be used to improve the selection process for its programs and, for those founders selected to participate, predict their probability of future success.

Antler - A Unique Early-Stage Venture Capital Firm¹

Antler was a global early-stage venture capital firm founded in 2017 by Magnus Grimeland (CEO & Co-founder, Harvard College 2007) and Fridtjof Berge (COO & Co-founder, HBS 2016) to invest in exceptional people who were building technology startups from the pre-seed stage onwards. In doing so, Antler aimed to solve several market inefficiencies they felt were systemic in startup ecosystems. In their view, these included lack of access to pre-seed funding, great co-founders, and a strong support network. "In many ecosystems, by the time the institutional capital came in, the founders had already spent at least six months or a year building the team and validating the problem and solution

Graduate School of Business Administration, 1947 Experimentation Works Stefan H. Thomke, 2020-02-18 Don't fly blind. See how the power of experiments works for you. When it comes to improving customer experiences, trying out new business models, or developing new products, even the most experienced managers often get it wrong. They discover that intuition, experience, and big data alone don't work. What does? Running disciplined business experiments. And what if companies roll out new products or introduce new customer experiences without running these experiments? They fly blind. That's what Harvard Business School professor Stefan Thomke shows in this rigorously researched and eye-opening book. It guides you through best practices in business experimentation, illustrates how these practices work at leading companies, and answers some fundamental questions: What makes a good experiment? How do you test in online and brick-and-mortar businesses? In B2B and B2C? How do you build an experimentation culture? Also, best practice means running many experiments. Indeed, some hugely successful companies such as Amazon, Booking.com, and Microsoft run tens of thousands of controlled experiments annually, engaging millions of users. Thomke shows us how these and many other organizations prove that experimentation provides significant competitive advantage. How can managers create this capability at their own companies? Essential is developing an experimentation organization that prizes the science of testing and puts the discipline of experimentation at the center of its innovation process. While it once took companies years to develop the tools for such large-scale experiments, advances in technology have put these tools at the fingertips of almost any business professional. By combining the power of software and the rigor of controlled experiments, today's managers can make better decisions, create magical customer experiences, and generate big financial returns. *Experimentation Works* is your guidebook to a truly new way of thinking and innovating.

Directory of Harvard Business School, 1986 **How the Harvard Business School Changed the Way We View Organizations** Jay W. Lorsch, 2023-11-08 Listen, observe, test: these three words lie at the heart of a powerful method for businesses' transformation. Behind this method is a deceptively simple idea: managers and management scholars must first take the pulse of a real business, get its case history, diagnose its problems, and only then solve them. Invented by the scholars who launched Harvard Business School, this medical model will still cure companies today. Damningly, during the last thirty years, business schools embraced the presumptions of economists, game theorists, and other calculators of abstraction. The solving of real-world, real-time problems has atrophied and stagnated. In this book, renowned scholar and emeritus professor Jay W. Lorsch marshals evidence, history, and insights from his more than fifty-year career at Harvard Business School to make the case for a return to the medical model: the practices of listening, observing, and testing, in which the fields of human relations and organizational behavior are rooted. By telling the history of the development of his field, Lorsch demonstrates how the medical model emerged in the years before World War II and for decades helped managers, management scholars, and consultants diagnose and solve the problems besetting companies, large and small. Explaining the case studies that define the practice he discusses, how the model has been refined and reapplied by later generations, and

how it can continue to address issues such as diversity leadership competition and optimal corporate board structures
