Adaptive Identification and Control of Uncertain Systems with Non-smooth Dynamics Jing Na,Qiang Chen,Xuemei Ren,2018-06-12 Adaptive Identification and Control of Uncertain Systems with Nonsmooth Dynamics reports some of the latest research on modeling identification and adaptive control for systems with nonsmooth dynamics e g backlash dead zone friction saturation etc The authors present recent research results for the modelling and control designs of uncertain systems with nonsmooth dynamics such as friction dead zone saturation and hysteresis etc with particular applications in servo systems The book is organized into 19 chapters distributed in five parts concerning the four types of nonsmooth characteristics namely friction dead zone saturation and hysteresis respectively Practical experiments are also included to validate and exemplify the proposed approaches This valuable resource can help both researchers and practitioners to learn and understand nonlinear adaptive control designs Academics engineers and graduate students in the fields of electrical engineering control systems mechanical engineering applied mathematics and computer science can benefit from the book It can be also used as a reference book on adaptive control for servo systems for students with some background in control engineering Explains the latest research outputs on modeling identification and adaptive control for systems with nonsmooth dynamics Provides practical application and experimental results for robotic systems and servo

motors **The Control Handbook** William S. Levine,1996-02-23 This is the biggest most comprehensive and most prestigious compilation of articles on control systems imaginable Every aspect of control is expertly covered from the mathematical foundations to applications in robot and manipulator control Never before has such a massive amount of authoritative detailed accurate and well organized information been available in a single volume Absolutely everyone working in any aspect of systems and controls must have this book Control Theory and Advanced Technology ,1995 *Scientific and Technical Aerospace Reports* ,1983-10 **Variational and Optimal Control Problems on Unbounded Domains**

Gershon Wolansky,Alexander J. Zaslavski,2014-07-01 This volume contains the proceedings of the workshop on Variational and Optimal Control Problems on Unbounded Domains held in memory of Arie Leizarowitz from January 9 12 2012 in Haifa Israel The workshop brought together a select group of worldwide experts in optimal control theory and the calculus of variations working on problems on unbounded domains The papers in this volume cover many different areas of optimal control and its applications Topics include needle variations in infinite horizon optimal control Lyapunov stability with some extensions small noise large time asymptotics for the normalized Feynman Kac semigroup linear quadratic optimal control problems with state delays time optimal control of wafer stage positioning second order optimality conditions in optimal control state and time transformations of infinite horizon problems turnpike properties of dynamic zero sum games and an infinite horizon variational problem on an infinite strip This book is co published with Bar Ilan University Ramat Gan Israel
