

Chapter 1: The Science of Physics**Section 1: What is Physics?**

The goal of physics is to use a small number of basic concepts, equations, and assumptions to describe the physical world.

Example: We can use the same physics to describe a satellite orbiting the Earth as we can to describe the interaction between two planets.

Physicists study physics to help describe the world around them. Physics also makes the inventions, appliances, tools, and building we live in possible. Without physics, it would feel like we were living in the stone age.

From life experiences, we know a lot about physics. We know what will happen if we leave a piece of ice out on a hot day.
