**Artificial Intelligence and IoT in Online Education Systems** Ramanujam E., Chandan Chakraborty, 2026-01-15

Design the future of digital education with this essential book that provides a comprehensive guide to leveraging AI and IoT to create dynamic inclusive virtual learning environments and effectively implement advanced online proctoring solutions. The rapid development of online learning environments and virtual classrooms coupled with the need for scalable personalized education systems has positioned AI as a key enabler of modern education. The advent of these technologies promises to reshape how we deliver, monitor, assess, and evaluate online learning. This book explores these critical intersections of technology and education, emphasizing the potential of AI and IoT not only to optimize outcomes but also to create more dynamic, responsive, and inclusive virtual learning environments. Focusing on problems that can be solved through computer vision, video, and audio streaming, class imbalance, data, audio-to-text processes, multi-modal and bi-modal aspects, hand-written strokes, text similarity, biomedical ethics, and advancements in machine and deep learning algorithms, this book comprehensively explores the effectiveness of these technologies in online proctoring. This essential guide will equip educators, technologists, administrators, and policymakers with the knowledge and perspective necessary to leverage these technologies effectively. Readers will find the book explores various AI tools and techniques adopted for online proctoring examination systems. Covers critical analytical aspects of AI-assisted systems. Describes a variety of experiments leading to uni and multi-modal systems and IoT-based architecture using computer vision, machine learning, and deep learning algorithms. Discusses the quality assurance and psychological aspects to preserve ethics during examinations. Audience: Educational researchers and policymakers as well as computer scientists working in AI, machine learning, data science, deep learning, computer vision, and statistics.

## **AI Applications in Online Higher Education Administration**

**AI Applications in Online Higher Education Administration** Kathleen S. Ives, Marie Cini, Ray Schroeder, 2026-03-09 AI is reshaping higher education fast. This book brings together faculty, instructional designers, technologists, and academic leaders who are on the front lines of that change. Their chapters offer honest reflections, practical examples, and thoughtful perspectives on how AI is influencing course design, assessment, student support, policy, and leadership. Rather than hype or fear, the contributors offer grounded insight into what it takes to integrate AI in ways that are ethical, equitable, and truly student-centered. They explore both opportunities and risks with an eye toward long-term impact, not just short-term solutions. Whether you're charting an institutional AI strategy or simply trying to understand what's ahead, this collection is a timely guide. It doesn't treat AI as a magic fix, but as a tool that, when used wisely, can help higher education become more human, not less.

**Artificial Intelligence in Our Language Learning Classrooms** Louise Ohashi, Mary Hillis, Robert Dykes, 2025-11-21 Artificial Intelligence in Our Language Learning Classrooms brings together leading researchers and practitioners exploring the pedagogical, ethical, and emotional dimensions of generative AI (GenAI) in second language (L2) education. Across two major sections, L2 skill development and

broader educational perspectives contributors offer theory informed and practice oriented insights into how GenAI can transform language teaching and learning Topics include conversational AI and chatbots writing development extensive reading pragmatics instruction ethics emotions and teacher led inquiry Through a balance of optimism and critical reflection this volume situates AI integration within established educational frameworks supporting teachers as they navigate the rapidly evolving technological landscape The book emphasizes teacher agency responsible innovation and the centrality of human connection in AI enhanced classrooms By combining empirical research case studies and reflective narratives it addresses both opportunities and challenges in using GenAI tools for language education This comprehensive resource is essential reading for language teachers researchers and teacher educators seeking to build informed ethical and pedagogically grounded approaches to AI integration in the L2 classroom
