It's what you offer when you offer and how you offer it to make as much money as you can as fast as you can. Ideally to make enough money from one customer to get and service at least two more customers in less than thirty days. And it rarely looks clean, but I break AI Money Models into three stages: Stage I Get Cash AI Attraction Strategies get more customers for less through YouTube channel optimization, automated social media content creation, compelling ebook generation. Stage II Get More Cash AI Upsell/Downsell Strategies make more money from them faster through engaging online course design, optimized Upwork/Fiverr service offerings. Stage III Get The Most Cash AI Continuity Strategies maximize their total money spent through automated email marketing systems, AI-powered customer relationship management. In real life, it happens like this: First, I get customers reliably with AI from YouTube, Amazon, Udemy. Then I make sure they pay for themselves reliably with AI from course sales or service delivery. Then I make sure they pay for other customers reliably with AI through automated marketing. Then I start maximizing each customer's long-term value with AI optimization. Then I spend as many advertising dollars as I can to print as much money as possible, backed by AI analytics. This is my cookbook for making money by leveraging AI synergy in the online world. It took me over a decade to learn all these tactics. It'll take you three hours. Use responsibly. Enjoy. If you want to learn more and make more money for your online business, then ADD TO CART use its contents and see for yourself. The Technicians of God Gavina, 2021-11-22. The Internet has become a battleground between pseudo-progressive forces and the new info-industrial powers. For this motive, gifted with wide unforeseen and timeless capacities, the unknown has been decoded in exchange for rising ancient dilemmas, long-lost quests, and titanic agents which clearly intend to dethrone historical charlatanism with a kind of post-modern equivalency. Through centuries of proven, controversial, or even speculative historical events, this book represents a timeless voyage in search of the so-required antidote for Internet Societies and Reality. Leaving to the reader the option of discerning what can hypothetically resemble any realistic experience or what should be tolerated as fruit of incredulous imagination, this book is introduced as a truly distinct approach which, on a quest format based on a pertinent logical projection inspired on the presented web, allows us to see the end of the Internet that we have all loved but also how we can try to save it away from blindfolded systematizations and fanatic capitalism. With incredible coincidences in relation to the new realities that have been presented to our sane collective mentality upon the emergence of the Internet, I've carefully assembled several known historical facts plus many more other pertinent visions that might lie on our creative minds to provide a proper image in relation to the unknown challenges which we have all been confronting since the inception of the Internet. In an overall approach, this book also reveals a very thrilling fictional, not-proven, and imaginary story crafted with the main objective of inspiring the ideal logical functioning for the Internet as based on the

worldwide implementation of a carefully architected plan The Purpose After all modern technology should not be the same as what is written in History
