Error Analysis and Interlanguage Stephen Pit Corder, 1981      **Error Analysis in SLA. An Investigation of Errors made by Polish Learners of English** Tom Keller, 2016-04-13 Seminar paper from the year 2010 in the subject English Language and Literature Studies Linguistics grade 3.0 Technical University of Braunschweig Englishes Seminar course Second Language Acquisition language English abstract In this paper I will investigate several language productions from Polish learners using the English language and try to uncover their errors Using Error Analysis I will describe and explain the reasons for the error production An interesting question will be whether the Polish speakers may have typical errors which could be related to their native language Due to the numerous kinds of errors it will be necessary to classify them and to relate them to certain reasons Furthermore there exists a difference between an error and a mistake Its importance will be discussed later on Even though Error Analysis initially offers helpful opportunities to investigate error production in a structured way it has several disadvantages which were criticized in past decades In the end the conclusion will give an overview of the contents and summary the handled topics During the last several decades linguists have investigated the way of acquiring a second language Learners have several ways of acquiring a language and the field of second language acquisition SLA tries to uncover and improve them When people try to learn a foreign language they produce a considerable amount of errors These errors have always been made in the learning process and will never cease to occur During the complex investigations of second language acquisition linguists have focused on Error Analysis EA with its aim to take a deeper look on learner production Around the late 60 s this particular analysis was established with an approach of Pit Corder This system shows that errors should be investigated to understand and also improve the linguists attempts of learning a second language Typical questions which arise are why learners make errors and what reasons do they have Before Pit Corder linguists used the Contrastive Analysis CA which examines certain errors and refers to a particular connection between the first and the second language The differences between these two types of analysis will be examined in detail in the following chapter Several steps are needed to analyze various errors in language Investigators have developed procedures to collect identify describe explain and lastly evaluate certain errors These certain steps will be described and underlined with certain examples      **Theory Construction in Second Language Acquisition** Geoff Jordan, 2004 Recently many SLA researchers have adopted a postmodernist approach which challenges the assumption that SLA research is a rationalist scientific endeavour The resulting epistemological arguments plus problems of theory proliferation contradicting theories and theory domain hinder progress towards a unified theory of SLA Theory Construction in SLA addresses these problems by returning to first principles it asks whether there is such a thing as reliable knowledge what is special about scientific method and how we can best explain SLA It is the first book to use the philosophy of science in order to examine the epistemological underpinnings of SLA research and evaluate rival theories of SLA Part One explores

the central issues in the philosophy of science defends rationality against relativists and offers Guidelines for theory assessment Part Two examines different theories of SLA and evaluates them in terms of how well they stand up to the Guidelines

*Error Analysis in New Language Acquisition* Andrea Letzel, 2016-11-17 Studienarbeit aus dem Jahr 2010 im Fachbereich Anglistik Linguistik Note 1,3 Johannes Gutenberg Universität Mainz Sprache Deutsch Abstract Error Analysis used in second language analysis studies the errors learners make in speech and writing It also studies the different types of errors and why they were made In this term paper two different types of learners will be considered who perform spontaneously with the help of a picture story There will be a special focus on the differences and similarities of their errors There are various possibilities how samples of learner language can be influenced Firstly the learner and his proficiency level have to be described and it is important if he speaks or learns other languages irrespective of the MT and the target language that is considered in the analysis The way of instruction plays also an important role because instructed language learning provides a different error background as if the learner tries to learn the language naturalistically The second part that has to be described is the language itself The medium can either be oral or written Generally the oral production consist of a more colloquial English for the simple reason that the learner has not as much time to think about formulation than in written speech Therefore the Genre and the content of the language production is Error Evaluation and Error correction are additional parts that have not to be included in every Error Analysis According to the dictionary of Linguistics the error analysis is subdivided and classified in modality levels of linguistic description form type and cause

*Interlanguage Error Analysis: an Appropriate and Effective Pedagogy for EFL Learners in the Arab World* Muhammad Khan Abdul Malik, 2020-05-31 First of all the author wants to make it crystal clear that the present work is of a great benefit both for the English and Arab learners of the target language either Arabic or English This edition of the book pinpoints previous researchers findings regarding English and Arabic phonological morphological and syntactic similarities and differences and how all these differences result in mistakes and errors by the Arab learners of English in their learning process These mistakes or errors are unconsciously or involuntarily made by Arab learners of English due to the differences between the system and sub systems of the two languages The present attempt is the result of my realization as an English language teacher as to how a teacher can minimize students difficulties in learning of English and maximize their knowledge skills and competency of English as a foreign or second language This is the first edition The work is pedagogically oriented and primarily intended to make teaching learning of English as a foreign second language a bit easy especially for the first year university students of English language in the Arab world Gulf area such as KSA UAE Kuwait and the Middle East Area such as Jordan Syria Lebanon and so on The focus is on phonetic and morpho syntactic variations in Arabic and English languages This area of research becomes more interesting through the assumptions i information about the differences and similarities between Arabic and English language is to be supplied at an

early stage since this facilitates the students learning task ii the differences are to be presented in pedagogically suitable format iii it is useful to separate and present phonetics morphological and syntactic categories as they function in suitable contexts and not merely abstract notions iv before students may tackle contrastive analysis they should have basic knowledge of Arabic and English languages similarities and differences and v pre modification and post modification of lexical and syntactic structures are to be explained appropriately
