Evaluation Engineering ,1994 Evaluation of Hash Functions for Multipoint Sampling in IP Networks Christian Henke,2012-03-02 Diploma Thesis from the year 2008 in the subject Computer Science Applied grade 1 Technical University of Berlin language English abstract Network Measurements play an essential role in operating and developing today s Internet A variety of measurement applications demand for multipoint network measurements e g service providers need to validate their delay guarantees from Service Level Agreements and network engineers have incentives to track where packets are changed reordered lost or delayed Multipoint measurements create an immense amount of measurement data which demands for high resource measurement infrastructure Data selection techniques like sampling and filtering provide efficient solutions for reducing resource consumption while still maintaining sufficient information about the metrics of interest But not all selection techniques are suitable for multipoint measurements only deterministic filtering allows a synchronized selection of packets at multiple observation points Nevertheless a filter bases its selection decision on the packet content and hence is suspect to bias i e the selected subset is not representative for the whole population Hash based selection is a filtering method that tries to emulate random selection in order to obtain a representative sample for accurate estimations of traffic characteristics The subject of the thesis is to assess which hash function and which packet content should be used for hash based selection to obtain a seemingly random and unbiased selection of packets This thesis empirically analyzes 25 hash functions and different packet content combinations on their suitability for hash based selection Experiments are based on a collection of 7 real traffic groups from different networks **IAENG Transactions on Engineering Sciences** Sio-Iong Ao,Alan Hoi-Shou Chan,Hideki Katagiri,Li Xu,2014-04-07 Two large international conferences on Advances in Engineering Sciences were held in Hong Kong March 13 15 2013 under the International MultiConference of Engineers and Computer Scientists IMECS 2013 and in London U K 3 5 July 2013 under the World Congress on Engineering 2013 WCE 2013 respectively IMECS 2013 and WCE 2013 were organize *The Engineering Design Primer* K.
