LINEAR PROGRAMMING

1.0 Introduction:

1.1 Linear Programming: Is a problem – solving approach developed to help managers make decisions. Numerous applications of linear programming can be found in today's competitive business environment, for example;

- Kodak uses linear programming to determine where to manufacture products throughout their worldwide facilities.
- Marathon Oil Company uses linear programming for gasoline blending and to evaluate the economics of a new terminal or pipeline.

2.0 Typical Applications of Linear Programming: These examples illustrate the diversity of linear programming applications. In each example, we are concerned with either maximizing or minimizing some quantity. Now try to analyse these examples.....

- (i) A Manufacturing Engineer may want to develop a production schedule and an inventory policy that will satisfy sales demand in future periods. Ideally, the schedule and policy will enable the company to satisfy demand and at the same time minimizes the total production and inventory costs.
- (ii) A Financial Analyst must select an investment portfolio from a variety of stock and bond investments alternative. *(typical business Management example)*
