SWOT Analysis Alan Sarsby,2016 Undertaking a SWOT analysis is a popular strategy tool and frequently the basis of an assignment for students of business studies This guide helps you with The critical theory Worked examples and case studies Where to look for the factors How to create strategic responses to a situation How to approach a swot assignment Avoiding the usual mistakes References so that you can hand in a great assignment SWOT Analysis Nadine Pahl,Anne Richter,2009-04 Research Paper undergraduate from the year 2007 in the subject Business economics Marketing Corporate Communication CRM Market Research Social Media grade 1 3 University of Applied Sciences Berlin course Marketing language English abstract Due to strong competition and a continuous market change most companies engage in strategic planning today to become or stay competitive in the long run Strategy is all embracing Strategy has to capture internal and external aspects that means to comprise competencies and market opportunities Strategy has to keep in view the own company the customers and the competitors The challenge is to create customer values and competitive advantages to assure benefits and growth As a result the starting point of every strategic decision demonstrates the recognition and the

analysis of the company's current situation containing a high variety of parameters. These parameters are generally defined by the company's influence into internal and external parameters. However, the understanding of the company's situation is only defined in absolute by analysing parameters and its bilateral dependencies. Therefore, the combination of the company's internal factors and the external environmental circumstances presents the basis for the strategy development and the resulting organisational marketing goals and application of the marketing instruments. The SWOT analysis is a strategic planning tool used to evaluate the Strengths, Weaknesses, Opportunities, and Threats of a company. It provides information that is helpful in matching the company's resources and capabilities to the competitive environment in which it operates. The resulting SWOT matrix contrasts the results of the internal analysis (strengths and weakness) and the external analysis (opportunities and threats) to define strategic fields of action. That application of a SWOT analysis is therefore instrumental in strategy formulation and selection.
