Technological Forecasting A Strategic Imperative:

Research Handbook on Innovation Governance for Emerging Economies Stefan Kuhlmann, Gonzalo

Ordóñez-Matamoros, 2017-01-27 Although in recent years some emerging economies have improved their performance in terms of R D investment outputs and innovative capacity these countries are still blighted by extreme poverty inequality and social exclusion Hence emerging countries are exposed to conditions which differ quite substantially from the dominant OECD model of innovation policy for development and welfare This Research Handbook contributes to the debate by looking at how innovation theory policy and practice interact and explains different types of configurations in countries that are characterized by two contrasting but mutually reinforcing features systemic failure and resourcefulness Focusing on innovation governance and public policies it aims to understand related governance failures and to explore options for alternative more efficient approaches

The Strategy Pathfinder Duncan Angwin, Stephen Cummings, Chris

Smith, 2011-12-12 This new edition of the popular The Strategy Pathfinder updates the micro cases of real life problems faced by companies and executives These micro cases help readers to engage with the kinds of situations they will encounter in their working lives while provoking discussions about key theoretical themes Original presentation and design makes this an essential companion for both the business school classroom and the executive briefcase The Strategy Pathfinder brings experienced and potential executives alike an instant guide to the concepts and techniques they need to know An innovative introduction to strategy Makes readers active producers of strategy rather than passive recipients of received wisdom Presents essential pathways through the strategy jungle Each case provokes discussion about a key theoretical theme Encourages readers to form a view themselves and then test it against the views of others before offering recommendations about how best to proceed Cases are drawn from Africa the Americas Asia Europe and Oceania Supported by online lecturer supplements

Startup Ecosystems Fabio Greco,2023-07-25 This book analyzes the components of the startup ecosystem including the characteristics that can favor or disadvantage the development of new innovative ventures The author believes it is essential to identify crucial variables of start up ecosystems that have a context specific influence on the well being and development of startups In this regard the book analyzes the concept of the start up ecosystem both from the point of view of scholars and professionals The author then deals with the diverse approaches to studying startup ecosystems which have over the years become increasingly complex and less linear making systematization indispensable The author provides therefore a classification with a transversal logic with respect to this diversity of contributions in the literature The main theoretical contributions to start up ecosystems are grouped according to the attention they place on three different variables territorial contexts resources and actors The author also presents qualitative interview based research using narrative analysis mode to

understand the three variables The work provides on the one hand the proposal of a framework as a theoretical interpretative model useful both for the description of the fundamental components of the start up ecosystem and also useful for giving a boost to future research On the other hand the book also presents evidence of a practical nature useful to support and guide the choices of startup founders and of managers of companies and institutions that orbit within start up ecosystems

Strategic Planning in Technology Transfer to Less Developed Countries Christian Madu, 1992-01-27 Despite an avalanche of literature over the last 30 years there has been relatively little written on the role played by strategic planning in the transfer of technology particularly from developed to less developed countries Technology transfer which involves the acquisition of inventive activity by secondary users is conceded vital to socio economic growth but usually it is looked at internationally from a micro perspective Unlike other books Madu s volume looks at technology transfer holistically It examines the advantages of technology transfer and its limitations by viewing recipient nations as systems in which social economic behavioral and political influences converge to help shape technological decisions Only when a systems perspective like this is adopted and technology seen as a strategic variable can technology transfer be understood and successfully implemented says Madu Madu thus identifies the failures of technology transfer as the result of malfunctions in three components of the system technology structure and behavior He analyzes these malfunctions offers ways to repair them and considers technology from the viewpoints of both transferrer and

receiver whose missions goals and objectives are often not only disparate but sometimes in conflict He then offers what he calls prescriptive frameworks and guidelines to help implement transfer and to see it as a variable that must be integrated into national development planning Throughout Madu makes it clear that the objective of technology transfer is the maximizing of social welfare Using this overarching premise he is able to evaluate both the benefits and the social costs associated with technology transfer and to develop his prescriptive integrative models Intended for specialists in international finance and development and international business management Madu s book will be of special value to teachers of graduate courses in socio economic development public policy and economics and to policymakers throughout government

Applying Methods and Techniques of Futures Research William L. Renfro,Wayne I. Boucher,1983-10-14 Much of our planning to date in higher education has focused on questions of internal effectiveness and efficiency but given the period of rapid social change we have entered it is imperative that we improve our abilities to assess changes in the external environment and examine their implications for higher education In this way we will be able to develop better goals strategies and plans to take advantage of emerging opportunities and head off potentially damaging developments The chapters in this sourcebook consider the problem of assessing the external environment in planning and are primarily concerned with the contributions that tradtional institutional research methods and perspectives make to institutional planning The purpose of this volume of New Directions for Institutional Research is to describe a variety of futures research techniques and to illustrate their utility for strategic planning This the 39th issue of New Directions for Institutional Research For more information on the series please see the Journals and Periodicals page **Technology Management 1** Tarek M.
