

## Virtual Reality & Augmented Reality

### Team

### Let's start with VR

Virtual Reality is a simulated experience that can be similar to or completely different from what is around us. It is a computer-generated simulation of a 3D environment that the user can interact with in a seemingly real or physical way. This is done by projecting stereoscopic image pairs to a display device that creates an illusion of depth when viewed. This technology is used in a wide range of applications, from entertainment to education and training.
