Geography's Media Turn Chris Lukinbeal, Stanley D. Brunn, 2026-01-29 This edited volume examines how the arts and sciences have had to adapt, engage, confront, and even alter research, teaching, and community service because of modern media. The book describes how academics work with and through the media in their daily and professional lives. The acceleration of changes to media in the digital age has been astounding, whether due to social media, web 2.0, new sensor technologies, fake news, or the rise of a post-truth news media economy. Many academics became media producers during COVID-19, having to engage in emergency remote teaching. Further, as academics, we can no longer publish our results and expect a metered response from all entities, but rather must promote and defend our work in the media and the classroom. There is almost no part of academic work, let alone human life, that is not affected by media. Many academics across the sciences and humanities now embrace the media as part of their daily practice and actively engage in media production through building podcasts and convergent media sites, managing online courses and degree programs, or being administrators or educators who interact with the media regularly at local, national, or international scales. The chapters are original and written by a group of interdisciplinary junior and senior scholars from various world regions.

Sustainability and Social Responsibility of the Media and in the Media Milan Todorovic, Samuel O. Idowu, Silvia Puiu, 2026-01-01 This book addresses several relevant questions that keep coming up as the media sector develops and changes. Although the field of media is multifaceted, it is still dominated by very large commercial interests. The multitude of platforms, devices, formats, and technologies spread across different market segments are often controlled within the same value and supply chain, are diagonally integrated, and are tightly regulated by a set of changing and evolving community rules. Therefore, this book discusses a wide range of issues related to notions of media in various corporate, independent, and operational contexts of ethics, ownership, authorship, originality, trustworthiness, economic, social, and even environmental sustainability. In this context, the book considers the notion of sustainability and social responsibility in media contexts from a variety of new, unbiased, and diverse perspectives, making it valuable for researchers and practitioners.

Law and the Digital Reanimation of the Dead Pranav Menon, 2026-02-09 This book analyzes the legal tensions that exist in the economy that purports to reanimate the dead using postmortem digital technologies. Technological reanimation has proven to be big business, with many notable commercial entities investing in this afterlife economy. Postmortem technologies convincingly replicate the appearance, physiognomy, conversation styles, and thought patterns of a deceased individual by generating digital copies that act in their stead. In the entertainment industry, new works can be created with dead celebrities through a postmortem copy that is managed by their representatives. The result is an economy in which the dead are offered as a product or service to consumers, with some having their artistic legacies extended past death through an afterlife career. Many stakeholders stand to benefit from such a lucrative afterlife economy, but the law is simply not prepared for the issues that will arise with this exploitation of the dead. Reanimation requires the exploitation of

one's reputation, persona, artistic works, and personal data. However, the corresponding legal protections are either nonexistent, inapplicable, or inconsistent across borders, depending on which posthumous interest is analyzed. In response, and by studying the contours of the existing legal protections in the afterlife economy, this book proposes a system rooted in the shared ownership of one's postmortem copy and the responsible stewardship of legacies through fiduciary duties. Law and the Digital Reanimation of the Dead will be of considerable interest to scholars working in the areas of entertainment law, intellectual property, and law and technology, as well as others with professional interests in the area.

Neurobiology and Artificial Intelligence Luca Saba, 2026-03-16. Neurobiology and Artificial Intelligence: Medical, Social, and Ethical Implications explores the dynamic intersection of neurobiology and artificial intelligence, investigating the scientific, philosophical, and ethical implications of these rapidly evolving fields. By blending cutting-edge research with thought-provoking discussions, the book aims to make complex topics accessible to an interdisciplinary audience, from researchers and upper graduate students eager to understand how AI and neuroscience shape our understanding of intelligence, creativity, learning, and the human condition. Offers clear explanations of scientific and technical concepts. Emphasizes the societal and moral challenges posed by advancements in AI and neuroscience. Explores how neurobiology and AI influence each other and their broader impact on medicine, creativity, and human cognition.
