How To Study Public Life Jan Gehl:

How to Study Public Life Jan Gehl, Birgitte Svarre, 2013-12-04 How do we accommodate a growing urban population in a way that is sustainable equitable and inviting This question is becoming increasingly urgent to answer as we face diminishing fossil fuel resources and the effects of a changing climate while global cities continue to compete to be the most vibrant centers of culture knowledge and finance Jan Gehl has been examining this question since the 1960s when few urban designers or planners were thinking about designing cities for people But given the unpredictable complex and ephemeral nature of life in cities how can we best design public infrastructure vital to cities for getting from place to place or staying in place for human use Studying city life and understanding the factors that encourage or discourage use is the key to designing inviting public space In *How to Study Public Life* Jan Gehl and Birgitte Svarre draw from their combined experience of over 50 years to provide a history of public life study as well as methods and tools necessary to recapture city life as an important planning dimension This type of systematic study began in earnest in the 1960s when several researchers and journalists on different continents criticized urban planning for having forgotten life in the city City life studies provide knowledge about human behavior in the built environment in an attempt to put it on an equal footing with knowledge about urban elements such as buildings and transport systems Studies can be used as input in the decision making process as part of overall planning or in designing individual projects such as streets squares or parks The original goal is still the goal today to recapture city life as an important planning dimension Anyone interested in improving city life will find inspiration tools and examples in this invaluable guide

Architecture and Welfare Thordis Arrhenius, Ellen Braae, Guttorm Ruud,2025-01-27 Architecture was fundamental to the realization of welfare state policy in the Nordic countries translating democratic ideals into concrete spatial materializations An inclusive notion of welfare for all was embraced by a generation of architects landscape architects and planners who labored to give physical form to ideas of equality collectivity and democracy producing a vast architectural output in Scandinavia during the postwar years Today however the architectural legacy of this era is contested Welfare for all no longer enjoys the social or political consensus it once did This publication critically engages with this contested architectural legacy and provides a nuanced portrait of postwar welfare architecture coming to terms with a contentious past and facing an uncertain future With newly commissioned photographic work by contemporary Nordic artists Based on an interdisciplinary research project by KTH Stockholm Oslo School of Architecture University of Copenhagen Internationally renown contributors shed light on aspects of the relationship between architecture and welfare
