Building the Titanic: Constructing the 'Unsinkable' Ship

Claim: This article explains how the author John Bennister was able to do this on the infamous ship.

Building the Titanic by John Bennister offers readers a captivating history of the RMS Titanic – a ship that symbolises luxury, ambition, and eventual tragedy. The book is painstakingly researched, bringing together financial data, social insights, and developments in engineering, to explain why and how the Titanic was built. A major achievement is Bennister's ability to convey the emotions experienced by key participants at each stage of the Titanic's story. Bennister begins with the ship's design and approval, explaining the reasons for the huge sinking of the Titanic on their accounts of how it was built. Bennister resumes the tragedy for the second half of the book so that during the early chapters, the reader can follow the excitement that surrounded the construction of the ship.

Chapter one sets the stage in the early 20th century with an analysis of the socio-economic factors that led to the Titanic's conception. Bennister's exploration of the intense competition among the shipping companies of the day provides important insight into why the White Star Line, Titanic's owners, were so determined to build the world's largest passenger ship. Like in the book, when trying to make sense of decisions about the ship's construction and sailing that appeared risky or even foolish, I found it helpful to read the chapter's exploration of the huge pressure White Star's owners faced.

Chapter two explains the complex financial basis behind the Titanic's construction. Bennister outlines the huge budget required by White Star, including it as an astonishing £500 million, equivalent to approximately \$500 million today. Interestingly, when he investigates the role played by the International Mercantile Marine Company (IMM) in providing the necessary financing, Bennister draws a unique conclusion: the fund requires a sophisticated sequence of shares and bond issuing by both IMM and White Star. He then uses this to convincingly reject the early reported idea that IMM financed the Titanic and argues instead that White Star financed IMM. It is an intriguing idea that warrants further exploration.

Chapter three details the design and engineering insights that defined the Titanic. Bennister provides a long list of specifics, such as the ship's length (in the centimetres), the number of rivets used and the precise amount of steel in the hull. Not being an engineering professional, I could admit my attention drifted a little here. Luckily, the chapter is saved by a fascinating discussion of how the premium materials used in the construction bolstered the infamous belief that the Titanic was 'unsinkable'.

Chapter four paints a vivid picture of what it was like to work on the construction of the Titanic at the inland and shipyard in Belfast. A staggering 15,000 workers were involved, and Bennister meticulously describes the diverse range of skilled professionals, including boilermakers, electricians, and plumbers, who contributed their expertise. An especially revealing aspect of this chapter is the inclusion of firsthand accounts from workers' letters and diary entries. Reading these, it becomes clear that while workers faced long hours, poor safety standards and low wages, they were also swept up in the excitement of constructing the largest and costliest ship. Bennister closes the first part of the book with an account of the ship's launch in 1911, watched by 100,000 spectators – a clear example of how Titanic had captured the public imagination.
