King, 2008-01-01 The Science of Psychology An Appreciative View by Laura King University of Missouri at Columbia is the first text to bring a truly appreciative view of psychology as a science and for exploring behavior to introductory students It is built around the idea that students must study the discipline of psychology as a whole that the sub disciplines are intricately connected and that human behavior is best understood by exploring its functioning state in addition to its potential dysfunctions For example imagine that you have been asked to create a science of watchology You have two watches that both have had the unfortunate trauma of being left in the pocket of someone s jeans through the washer and dryer One watch has suffered the worst possible fate it no longer tells time The other has emerged from the traumatic event still ticking Which watch would you use to develop your new science of watchology Clearly the working watch will help you understand watches better than the broken one What does watchology have to do with psychology Quite simply in psychology as in watchology it makes sense to start with what works to gain a general understanding of human behavior and then apply that knowledge to those who have emerged from life s experiences in dysfunction
