Institution of Civil Engineers

INSE | INSTITUTION OF STRUCTURAL ENGINEERS

THE INSTITUTION OF STRUCTURAL ENGINEERS
TEL: 01753 456410

The JBM:

- Founded in 1977, now completing our 32nd year.
- Original institutions: ICE, the Municipal and District.
- CIBSE a member for a time.
- More recently, IET and IASG have joined ICE and District on the JBM.

Composition of the JBM:

- All appointments are made by the institutions, normally for 3 years.
- 20 member Board: 10 from industry, 10 academic members, usually representing the interests of participating institutions.
- Chairman rotates: industry / academic
- 30 strong panel of visiting moderators, including Board members - visiting teams comprise 2 academics and 2 from industry + secretary.

The main activities of the JBM:

- To formulate and publish guidelines agreed upon by the member institutions for the design of Civil Engineering courses for Bachelor and Master degrees.
- To undertake accreditation of the educational base both the institution membership and the course, by means of the ECET Chair and Ring arrangements.
- ECET Chair requires the institutions to formally accredit, as the JBM makes recommendations to the institutions for their consideration and adopt.
- The JBM guidelines seek not to be prescriptive, but rather to recognise the diversity of university provision throughout the U.K. with different emphases between core, supporting and optional.
 - The JBM accredits degrees at some 18 departments on a 3-year cycle.

The JBM guidelines, 2009

All programmes should place emphasis on a fundamental and thorough understanding of the principles of engineering science. Students should be able to identify, understand and apply the principles with confidence. An understanding of the concepts of stability and modes of failure will complement this understanding. In broad terms the development of engineering science (including relevant mathematics) should constitute around fifty percent of the programme, with the emphasis dependent upon the nature of the degree programmes.

Structural Analysis Bryant G. Nielson, Jack C. McCormac, 2017-02-28 When teaching structural analysis some contend that students need broad exposure to many of the classical techniques of analysis while others argue that learners benefit more from the computer based analysis experiences that involve parametric studies *Structural Analysis Understanding Behavior* strikes a balance between these viewpoints Students may no longer need to know every classical technique but they still need a fundamental knowledge of the concepts which come from studying a subset of classical techniques This foundation is then strengthened by the use of structural analysis software in activities designed to promote self discovery of structural concepts and behaviors This text was developed with this goal in mind
