We studied different animals to understand evolution. Summarize how each of the examples below illustrate evolution by natural selection.

16. Rock pocket mice

the rock pocket mice evolved through the environment and overtime the color and gene of the mice started to change to the all the environment so they changed to blend in so they're not in danger.

17. Elephants (tusks)

Some of the elephants didn't have tusks mostly the girls because of a sex-linked gene.

18. Beaks of finches in the Galapagos

the different beaks got longer and evolved as time went on and got longer as the environment changed.
