Lexical Polycategoriality Valentina Vapnarsky, Edy Veneziano, 2017-10-15 This book presents a collection of chapters on the nature, flexibility, and acquisition of lexical categories. These long-debated issues are looked at anew by exploring the hypothesis of lexical polycategoriality according to which lexical forms are not fully or univocally specified for lexical category in a wide number of unrelated languages and within different theoretical and methodological perspectives. Twenty languages are thoroughly analyzed. Apart from French, Arabic, and Hebrew, the volume includes mostly understudied languages spoken in New Guinea, Australia, New Caledonia, Amazonia, Meso, and North America. Resulting from a long-standing collaboration between leading international experts, this book brings under one cover new data, analyses, and results on word categories from the linguistic and acquisitional point of view. It will be of the utmost interest to researchers, teachers, and graduate students in different fields of linguistics: morpho-syntax, semantics, typology, language acquisition, as well as psycholinguistics, cognition, and anthropology.

301 Polish Verbs Klara Janecki, 2000-02 The most commonly used Polish verbs are presented one to a page in this compilation of 301 verbs. Verb indexes list almost 2300 verbs, and the book also features Polish proverbs, puzzles, and self-tests.

Language Processing and Acquisition in Languages of Semitic, Root-Based, Morphology Joseph Shimron, 2003-04-28 This book puts together contributions of linguists and psycholinguists whose main interest here is the representation of Semitic words in the mental lexicon of Semitic language speakers. The central topic of the book confronts two views about the morphology of Semitic words. The point of the argument is: Should we see Semitic words morphology as root based or word based? The proponents of the root based approach present empirical evidence demonstrating that Semitic language speakers are sensitive to the root and the template as the two basic elements bound morphemes of Semitic words. Those supporting the word based approach present arguments to the effect that Semitic word formation is not based on the merging of roots and templates but that Semitic words are comprised of word stems and affixes like we find in Indo European languages. The variety of evidence and arguments for each claim should force the interested readers to reconsider their views on Semitic morphology. *Hebrew studies*, 2006

The Semitic Languages John Huehnergard, Na'ama Pat-El, 2013-10-08 The Semitic Languages presents a unique comprehensive survey of individual languages or language clusters from their origins in antiquity to their present day forms. The Semitic family occupies a position of great historical and linguistic significance: the spoken and written languages of the Phoenicians, Hebrews and Arabs spread throughout Asia and northern and central Africa; the Old Semitic civilizations in turn contributed significantly to European culture and modern Hebrew, modern literary Arabic, Amharic and Tigrinya have become their nations official languages. The book is divided into three parts and each chapter presents a self contained article written by a recognized expert in the field: I General Issues providing an introduction to the grammatical traditions, subgrouping and writing systems of this language family; II Old Semitic Languages; III Modern Semitic Languages. Parts II and III contain structured chapters which enable the reader to access and compare information easily. These individual descriptions of each language or cluster include phonology, morphology, syntax, lexis and dialects. Suggestions are made for the most useful sources of further reading and the work is comprehensively indexed.
