Andrew, 2012-01-11 This book explores the social construction of age in the context of EFL in Mexico It is the first book to address the age factor in SLA from a social perspective Based on research carried out at a public university in Mexico it investigates how adults of different ages experience learning a new language and how they enact their age identities as language learners By approaching the topic from a social constructionist perspective and in light of recent work in sociolinguistics and cultural studies it broadens the current second language acquisition focus on age as a fixed biological or chronological variable to encompass its social dimensions What emerges is a more complex and nuanced understanding of age as it intersects with language learning in a way that links it fundamentally to other social phenomena such as gender ethnicity and social class **American Headway Second Edition Starter Level Teachers Book** John Soars, 2010-06-01

The world's most trusted English course now with a new generation of digital support **Evaluating Second Language Vocabulary and Grammar Instruction** Frank Boers, 2021-03-14 Providing a much needed critical synthesis of research on teaching vocabulary and grammar to students of a second or foreign language this book puts the research into perspective in order to distil recommendations for language teaching Boers evaluates a comprehensive range of both well established and

lesser known research strands and classroom practices to draw out the most effective instructional approaches to teaching words multiword expressions and grammar patterns Chapters discuss learning as a by product of communicative activities language focused instruction diverse types of exercises mnemonic techniques and more with a view to building bridges between the available research on such instructional approaches and how they are commonly implemented in actual language courses and textbooks This book helps teachers make research informed decisions regarding their instructional approaches to words phrases and patterns and direct researchers to specific areas in need of further inquiry Boers not only demonstrates how research findings can inform effective teaching but also calls for a deeper appreciation on the part of researchers of the realities of the teaching profession making this a worthwhile text for preservice teachers teacher educators graduate students and scholars

[Understanding Multimodal Discourses in English Language Teaching Textbooks](#) Christopher A. Smith,2022-08-11 Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching ELT However they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers teachers and students This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective one that is based on sound current research but also offers practical guidance to teachers Building from a foundational understanding of ELT textbooks the author presents a systematic procedure to critically analyze their multimodal discourse examine how those discourses are negotiated between teachers and students in class and measure how those consumers privately value the lessons The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis where not only the text but the pictures websites audio visual elements too are subjected to a process which can reveal underlying ideologies assumptions omissions and reifications The triangulated approach demonstrated in a series of vignettes featuring Korean university students and native English speaking instructors can inform textbook choice instigate change and inspire lesson re contextualization to best suit the needs of its primary consumers
