arrangements and its own privileged position. The mainstreaming of bioethics has resulted in its domestication; it is at home in the institutions it would once have viewed with skepticism and a central part of practices it would once have challenged. Contemporary bioethics is increasingly dominated by a conception of autonomy that detaches the value of choice from the value of the things chosen, and the central role occupied by this conception makes it difficult for the bioethicist to make ethical judgments. Consequently, despite its very public successes, contemporary bioethics is largely failing to offer the ethical guidance it purports to be able to provide. In addition to providing a critique, this book offers an alternative framework that is designed to allow bioethicists to address the concerns that led to the creation of bioethics in the first place. This alternative framework is oriented around a conception of autonomy that works within the ethical guidelines provided by a contemporary form of virtue ethics and which connects the value of autonomous choice to a conception of human flourishing.

It examines the foundational beliefs, historical challenges, and modern-day threats to Christianity while providing a detailed overview of apologetics from early Christianity to the present. The book emphasizes the need for respectful and intellectually rigorous strategies to engage with contemporary culture, address doubts, and reinvigorate faith. Drawing on insights from renowned defenders of the faith, it highlights the importance of apologetics in strengthening the Church's witness and fostering meaningful dialogue, making a compelling call for the Church to present the gospel with confidence, clarity, and compassion. Informed Consent in Predictive Genetic Testing Jessica Minor, 2015-06-15 This important book proposes revising the current informed consent protocol for predictive genetic testing to reflect the trend toward patient-centered medicine. Emphasizing the predictive aspect of testing, the author analyzes the state of informed consent procedure in terms of three components: comprehension of risk, assessment, disclosure to select appropriate treatment, and voluntariness. The book's revised model revisits these cornerstones, restructuring the consent process to allow for expanded comprehension, time-enhanced patient safety, greater patient involvement and autonomy, and reduced chance of coercion by family or others. A comparison of the current and revised versions and case studies showing the new model in real-world applications add extra usefulness to this resource. Included in the coverage: The science behind PGT, Understanding genetic risks and probability, The history of informed consent, Revised model of informed consent, comprehension, disclosure, voluntariness, patient safety, Applications of the model in DTC and pleiotropic genetic testing, Implementation of the revised model and assessing its effectiveness. A milestone in the bioethics literature, *Informed Consent in Predictive Genetic Testing* will be of considerable interest to genetic counselors, medical and bioethicists, and public health professionals.

Love and Politics Jeffery L. Nicholas,2021-06-07 In *Love and Politics* Jeffery L. Nicholas argues that Eros is the final rejection of an alienated life in which humans are prevented from developing their human powers Eros in contrast is an overflowing of acting into new realities and new beauties a world in which human beings extend their powers and senses Nicholas uniquely interprets Alasdair MacIntyre s Revolutionary Aristotelianism as a response to alienation defined as the divorce of fact from value However this account cannot address alienation in the form of the oppression of women or people of color Importantly it fails to acknowledge the domination of nature that blackens the heart of alienated life Alienation must be seen as a separation of the human from nature Nicholas turns to Aristotle first to uncover the way his philosophy embodies a divorce of human from nature then to reconstruct the essential elements of Aristotle s metaphysics to defend a philosophical anthropology based on Eros *Love and Politics* Persistent Human Desires as a Foundation for Liberation presents a critical theory that synthesizes MacIntyre s Revolutionary Aristotelianism Frankfurt School Critical Theory and Social Reproduction Theory It will be of great interest to political theorists and philosophers
