Bachus, A Custodio, 2003-07-25

Pumps are commonly encountered in industry and are essential to the smooth running of many industrial complexes. Mechanical engineers entering industry often have little practical experience of pumps and their problems and need to build up an understanding of the design operation and appropriate use of pumps plus how to diagnose faults and put them right. This book tackles all these aspects in a readable manner drawing on the authors long experience of lecturing and writing on centrifugal pumps for industrial audiences. *Fusion Technology 1992* C. Ferro, M. Gasparotto, H. Knoepfel, 2013-10-22 The aim of the biennial series of symposia on Fusion Technology organized by the European Fusion Laboratories is the exchange of information on the design construction and operation of fusion experiments and on the technology being developed for the next step devices and fusion reactors. The coverage of the volume includes the technological aspects of fusion reactors in relation to new developments thus forming a guideline for the definition of future work. These proceedings comprise three volumes and contain both the invited lectures and contributed papers presented at the symposium which was attended by 569 participants from around the globe. The 343 papers including 12 invited papers characterise the increasing interest of industry in the fusion programme giving a broad and current overview on the progress and trends fusion technology is experiencing now as well as indicating the future for fusion devices. **Kempe's engineers year-book** Carill Sharpe, 1994
