Biochemical Engineering Debabrata Das, Debayan Das, 2019-07-15 All engineering disciplines have been developed from the basic sciences Science gives us the information on the reasoning behind new product development whereas engineering is the application of science to manufacture the product at the commercial level Biological processes involve various biomolecules which come from living sources It is now possible to manipulate DNA to get the desired changes in biochemical processes This book provides students the knowledge that will enable them to contribute in various professional fields including bioprocess development modeling and simulation and environmental engineering It includes the analysis of different upstream and downstream processes The chapters are organized in broad engineering subdisciplines such as mass and energy balances reaction theory using both chemical and enzymatic reactions microbial cell growth kinetics transport phenomena different control systems used in the fermentation industry and case studies of some industrial fermentation processes Each chapter begins with a fundamental explanation for general readers and ends with in depth scientific details suitable for expert readers The book also includes the solutions to about 100 problems Biotechnology Engineering Vinayaka B. Shet, Sandesh Kanthakere, Nabisab Mujawar Mubarak, Rama Rao Karri, Mohammad Hadi Dehghani, 2025-08-26 Biotechnology Engineering A Practical Approach on Bioprocess Development from Lab to Industrial Scale offers a comprehensive guide on biotechnology engineering focusing on transforming research and development into commercially viable industrial processes The book addresses the needs of the market by providing structured chapters practical methods and real world case studies Readers will gain valuable insights into bioprocessing basics scalable solutions optimization techniques and collaboration opportunities The text also covers essential regulatory compliance information bridging the gap between theoretical knowledge and practical applications The book is a vital resource for academics scientists engineers and professionals in bioprocess development It includes detailed discussions calculations and case studies modern bioreactors and software tools used in the industry Serving as a desktop reference it effectively combines theory with real world

applications to support the development of bioprocesses on all scales Helps readers understand the practical approach involved in bioprocess developments Includes calculations and case studies that are essential for independently scaling up bioprocesses from Erlenmeyer flask studies to bioreactors Provides insights into auditing requirements for the bioprocess industry Biodesulfurization in Petroleum Refining Nour Shafik El-Gendy, Hussein Mohamed Nabil Nassar, 2018-11-14 From basic tenets to the latest advances this is the most comprehensive and up to date coverage of the process of biodesulfurization in the petroleum refining industry Petroleum refining and process engineering is constantly changing No new refineries are being built but companies all over the world are still expanding or re purposing huge percentages of their refineries every year year after year Rather than building entirely new plants companies are spending billions of dollars in the research and development of new processes that can save time and money by being more efficient and environmentally safer Biodesulfurization is one of those processes and nowhere else it is covered more thoroughly or with more up to date research of the new advances than in this new volume from Wiley Scrivener Besides the obvious benefits to biodesulfurization there are new regulations in place within the industry with which companies will over the next decade or longer spend literally tens if not hundreds of billions of dollars to comply Whether for the veteran engineer needing to update his or her library the beginning engineer just learning about biodesulfurization or even the student in a chemical engineering class this outstanding new volume is a must have Especially it covers also the biougrading of crude oil and its fractions biodenitrogenation technology and application of nanotechnology on both biodesulfurization and biodenitrogenation technologies **Encyclopedia of Agricultural, Food, and Biological Engineering** Dennis R. Heldman, Carmen I. Moraru, 2010-10-21 Examining the role of engineering in delivery of quality consumer products this expansive resource covers the development and design of procedures equipment and systems utilized in the production and conversion of raw materials into food and nonfood consumer goods With nearly 2000 photographs figures tables and equations including 128 color figures the book emphasizes and illustrates the various engineering processes associated with the production of materials with agricultural origin With contributions from more than 350 experts and featuring more than 200 entries and 3600 references this is the largest and most comprehensive guide on raw production technology *Biochemical Engineering and Biotechnology* Ghasem Najafpour, 2015-02-24 Biochemical Engineering and Biotechnology 2nd Edition outlines the principles of biochemical processes and explains their use in the manufacturing of every day products The author uses a diirect approach that should be very useful for students in following the concepts and practical applications This book is unique in having many solved problems case studies examples and demonstrations of detailed experiments with simple design equations and required calculations Covers major concepts of biochemical engineering and biotechnology including applications in bioprocesses fermentation technologies enzymatic processes and membrane separations amongst others Accessible to chemical engineering students who need to both learn and apply biological knowledge in engineering principals

Includes solved problems examples and demonstrations of detailed experiments with simple design equations and all required calculations Offers many graphs that present actual experimental data figures and tables along with explanations
