She saw kids wearing T-Shirts with slogans like "Spoiled Brat" or "I'm Stupid" and thought they were not "how happy kids think". Her research supported her contention. Kids preferred T-Shirts with "First grade rocks !", "Go Green". She created a business, "My kids". In her retail business, children under 18 submitted designs for T-Shirts, and customers voted on their favourites. The winners were added to her product line and received 3 percent of the profits from their designs.

Rashida Verma wanted to do more than just create a happy T-shirt retail outlet. From the beginning, her company had a charitable component. It donated part of its profits to a program called 'Free Arts for Abused Children'. As a teacher, she said, "I always stressed to my kids the idea of giving, the idea of sharing and this is how I run my business."

Previous Exam Papers for Business and Management Sciences (BMS) 2013-2014 University of Kurdistan Hewler, 2014

Digital Disruptive Innovation Joe Tidd, 2019-08-21 Its focus is the major theme of digital innovation and it tries to go beyond the hype associated with much of the discussion of this important area The discussion in the book stresses the need to move our thinking about innovation

beyond the level of enterprise to consider ecosystems and complementary assets Overall this is a useful book not least because in addition to opening up key lines for further research enquiry the book also has a strong international flavour with contributions from a wide and diverse set of contexts International Journal of Innovation Management There is no doubt that digital technologies have the potential for disruptive innovation in a wide range of sectors both in manufacturing and services and the commercial and social domains However popular commentaries on the potential of digital innovation to disrupt have suffered from two extreme positions either simplistic technological determinism often promoted by technology vendors claiming that the impending widespread automation of products and services will provide step changes in productivity and new products and services or alternatively very high level broad discussions of business model innovation in traditional sectors private and public However the impacts will not be universal and the outcomes will be highly differentiated More fundamentally neither a narrow technological perspective or broad business view adequately captures the appropriate level of granularity necessary to understand the potential and challenges presented by digital innovation In this book Digital Disruptive Innovation we apply innovation concepts models and research to provide greater insights into strategies for and management of digital innovation
