Internet Guide to Knowledge Management and Intellectual Capital Sabine Pekarz, 2002-03-07 Inhaltsangabe

Abstract This survey has shown that although the internet is full of information it is difficult to find the information required fast Before starting an internet survey it is essential to be conscious of the intention of the search and the expected results and to translate this into one or more keywords The intention of the keyword searches knowledge management and intellectual capital was to find out how the topic is treated on different pages The categorization by content has shown that a main part of the links can be assigned in the advertisement categories This is the case for both the hits of MetaCrawler and those of Umap A further community of the results of the two search instruments is that the categories knowledge base and best practices only take a small part whereas the categories content discussion and collection of resources are relatively well attended Great importance has been attached to the category content discussion in the index and chapter 6 is fully dedicated to interesting links concerning the content This is because the discussion of the topics combined with definitions and explanations is the background and the basis for the rest of the categories As the assignment to the category content discussion does not declare anything about the quality of the discussions the index in chapter 4 has to be included in the study Strictly speaking a great part of those links is dedicated to advertisement and gives some explanations concerning the topics It has been detected that most of the pages with content discussion give only a short introduction into the topic The pages that examine the topics more closely are an exception to the rule Five links of this minority are introduced in chapter 6 Two of them are very interesting pages concerning the content They are listed at top position because different opinions concerning knowledge management and intellectual capital are introduced the topics are treated in great detail and the explanations are good and quite easy to duplicate In order to find out if the results are capable to represent the totality the reliability of the categorization built up with Umap artificial intelligence and that built by human intelligence have been analyzed with the means of hypothesis The test of the hypothesis that are based on a comparison of the results and processes of the categorizations has shown that the categorization by
