**Smart Trends in Computing and Communications** Tomonobu Senjyu, Chakchai So-In, Amit Joshi, 2024-06-01 This book gathers high quality papers presented at the Eighth International Conference on Smart Trends in Computing and Communications SmartCom 2024 organized by Global Knowledge Research Foundation GR Foundation from 12 to 13 January 2024 in Pune India It covers the state of the art and emerging topics in information computer communications and effective strategies for their use in engineering and managerial applications It also explores and discusses the latest technological advances in and future directions for information and knowledge computing and its applications Foundations of Artificial Intelligence and Robotics Wendell H. Chun, 2024-12-24 Artificial intelligence AI is a complicated science that combines philosophy cognitive psychology neuroscience mathematics and logic logicism economics computer science computability and software Meanwhile robotics is an engineering field that compliments AI There can be situations where AI can function without a robot e g Turing Test and robotics without AI e g teleoperation but in many cases each technology requires each other to exhibit a complete system having smart robots and AI being able to control its interactions i e effectors with its environment This book provides a complete history of computing AI and robotics from its early development to state of the art technology providing a roadmap of these complicated and constantly evolving subjects Divided into two volumes covering the progress of symbolic logic and the explosion in learning deep learning in natural language and perception this first volume investigates the coming together of AI the mind and robotics the body and discusses the state of AI today Key Features Provides a complete overview of the topic of AI starting with philosophy psychology neuroscience and logicism and extending to the action of the robots and AI needed for a futuristic society Provides a holistic view of AI and touches on all the misconceptions and tangents to the technologies through taking a systematic approach Provides a glossary of terms list of notable people and extensive references Provides the interconnections and history of the progress of technology for over 100 years as both the hardware Moore s Law GPUs and software i e generative AI have advanced Intended as a complete reference this book is useful to undergraduate and postgraduate students of computing as well as the general reader It can also be used as a textbook by course convenors If you only had one book on AI and robotics this set would be the first reference to acquire and learn about the theory and practice Creative Convergence James Hutson, Jason Lively, Bryan Robertson, Peter Cotroneo, Martin Lang, 2023-11-14 Embark on a journey that transcends the boundaries of art and technology in the groundbreaking realm of Creative Convergence The AI Renaissance in Art and Design This isn t just another book on art and technology it s a journey that sparks curiosity fuels innovation and challenges traditional artistic boundaries Discover the power of generative Artificial Intelligence AI as it melds with human expression propelling artistry into uncharted territories and redefining traditional notions of both originality and creativity The text is not just about art or AI it is about the fusion of both catalyzing a creative revolution that challenges previous assumptions about human machine

collaboration and how ideation conceptualization process and execution are radically rethought Have you ever wondered how will AI revolutionize training education and execution in art and design Delve into this captivating treatment that contextualizes the disruptions we are experiencing today in the technological innovations and artistic responses and integrations of the past five hundred years Human creativity has always struggled against technological advance but ultimately integrated and redefined what art is in each era As such you will see how AI can be incorporated in various artistic disciplines in this study Explore real world case studies that showcase AI s practical impact on 3D design drawing digital art and even web design The book also addresses the controversial question Can AI be a co creator in the creative and artistic process even assisting in creating an original signature style Brace yourself for revelations that will challenge your perceptions of traditional artistry

#### Recent Advances in Big Data, Machine, and Deep Learning for Precision Agriculture

Muhammad Fazal Ijaz, Marcin Wozniak, 2025-12-09 Precision agriculture can be defined as applying real time reliable information to optimize the use of resources and the management of farming practices minimizing environmental impacts With the evolution of remote sensing technologies big data that must be converted to information is being generated in the agricultural sector When analysed with machine and deep learning approaches applied to remote sensing products this data has been used successfully The computational power using cloud based systems and recent advances in farm machinery equipment providing data collection processing and analysis opens several opportunities to develop and adopt new technologies Large scale farm precision experimentation conducted in partnership with commercial farms and the appearance of new sensors on board UAVs crop duster airplanes and satellites such as radar technologies that allow daily remote data collection under cloudy skies are exciting and require more investigation In addition new equipment and sensors are enabling improved crop monitoring and land use mapping on a regional scale Recent advances in imaging and information technology have led to the massive production of digital images of plant specimens and living plants worldwide Computer vision and machine learning approaches are up and coming technologies to investigate and interpret digitized images of wild and domesticated taxa Deep learning technologies have been recently shown to achieve impressive performance on a variety of predictive tasks such as automated species identification trait detection and organ counting measurement and recognition The objective of this Research Topic is to explore how big data machine and deep learning algorithms are being applied to precision agriculture and plant health This topic will investigate how these tools could be used and improved in the future to aid food security mainly involving the integration of state of the art technologies We hope to increase the recognition and accessibility of AI ML tools in agricultural and plant research This Research Topic will bring together researchers from diverse fields and specializations such as plant bioinformatics computer engineering computer science agricultural engineering environmental engineering food engineering information technology and mathematics This Research Topic welcomes diverse types of articles including original research reviews and perspective papers Potential

topics include but are not limited to Big data machine and deep learning for plant and fruit disease classification Features optimization for plant disease classification Classification of plant types using big data machine and deep learning Recognition of plant and fruit diseases using big data machine and deep learning On farm precision experimentation Monitoring and surveillance using hyperspectral images Monitoring crop areas Convolutional Neural Network based fruit and crop disease detection Fusion of fully connected layers for classification of plant disease Selection of optimal features for plant disease
