- Which one(s) among the following is/are chemical property?

What are Physical Properties?

Such as color, taste, smell, texture, boiling point etc. are called physical properties of the substance.

If physical properties of a substance does not change observed without changing the identity of the substance. However the properties of an object may change in nature. For example, you can observe an object under various shape, color, or weight. In general, the properties of an object are determined by the properties of the materials the object consists of.

Many of the physical properties of materials does not change by change in its composition. These properties include density, hardness, magnetism, and the ability to conduct heat and electricity.

Some physical properties depend on how much of a material you have. In other words, a large amount of a material may have different properties than smaller amount of the material. Other physical properties do not depend on how much of the material you have. They show that no matter how large or small amount of material is the particular property is always the same.
