Developmental Systems Theory Donald H. Ford, Richard M. Lerner, 1992-05-30 For decades there hasn't been an integrative theory of development only theories about various developmental domains such as language acquisition personality and peer relations Two leading developmentalists Donald H Ford and Richard M Lerner present the first integrative theory on human development Through a synthesis of developmental contextualism and the Living Systems Framework the authors develop a theory that examines how a person carries out transactions with their environment and through that transaction how their biological psychological behavioral and environmental elements change or remain constant They also offer important implications of Developmental Systems Theory DST for research implications for use in educational

and clinical settings and the usefulness of DST in the formulation of social policy By intergrating the result from many research investigations into a larger framework Developmental Systems Theory offer researchers professionals and students a better understanding of how multiple elements interact and shape a person s life *Science in Its Context* John Brierley,1964 *The Sciences in the American Context* American Association for the Advancement of Science,1979 **Journal of Biological Education** ,1989 *Biology: A Community Context* ,2000-01-01
