*Quantitative Genetics and Crop Breeding* Thirugnanakumar S, 2012-01-01 The present work is unique in that sense it gives formulae along with actual data analyzed for the easy understanding This book is mainly meant for post graduate and research scholars in Quantitative Genetics A careful perusal of the book will give clear cut idea about the interpretation of the data and formulation of breeding strategies      **Genomics Data Analysis for Crop Improvement** Priyanka Anjoy, Kuldeep Kumar, Girish Chandra, Kishor Gaikwad, 2024-01-09 This book addresses complex problems associated with crop improvement programs using a wide range of programming solutions for genomics data handling and sustainable agriculture It describes important concepts in genomics data analysis and sequence based mapping approaches along with references The book contains 16 chapters on recent developments in several methods of genomic data analysis for crop improvements and sustainable agriculture all authored by eminent researchers who are experts in their fields These chapters focus on applications of a wide range of key bioinformatics topics including assembly annotation and visualization of next generation sequencing NGS data expression profiles of coding and noncoding RNA statistical and quantitative genetics trait based association analysis quantitative trait loci QTL mapping and artificial intelligence in genomic studies Real examples and case studies in the book will come in handy when applying the techniques The relative scarcity of reference materials covering bioinformatics applications as compared with the readily available books also enhances the utility of this book The targeted readers of the book are scientists researchers and bioinformaticians from genomics and advanced breeding in different areas The book will appeal to the applied researchers engaged in crop improvements and sustainable agriculture by using bioinformatics tools students research project leaders and practitioners from the various marginal disciplines and interdisciplinary research      **Applied Bioinformatics, Statistics & Economics in Fisheries Research** Nirranjan Sarangi, 2008 With reference to India contributed articles      **Demand-driven technologies for sustainable maize production in West and Central Africa** ,      *Genetic Diversity in Plants* Mahmut Caliskan, 2012-03-14 Genetic diversity is of fundamental importance in the continuity of a species as it provides the necessary adaptation to the prevailing biotic and abiotic environmental conditions and enables change in the genetic composition to cope with changes in the environment Genetic Diversity in Plants presents chapters revealing the magnitude of genetic variation existing in plant populations The increasing availability of PCR based molecular markers allows the detailed analyses and evaluation of genetic diversity in plants and also the detection of genes influencing economically important traits The purpose of the book is to provide a glimpse into the dynamic process of genetic variation by presenting the thoughts of scientists who are engaged in the generation of new ideas and techniques employed for the assessment of genetic diversity often from very different

perspectives The book should prove useful to students researchers and experts in the area of conservation biology genetic diversity and molecular biology

**Plant Breeding** H.K. Jain,M.C. Kharkwal,2012-12-06 The Indian Society of Genetics and Plant Breeding was established in 1941 in recognition of the growing contribution of improved crop varieties to the country s agriculture Scientific plant breeding had started inIndia soon after the rediscovery of Mendel s laws of heredity The Indian Agricultural Research Institute set up in 1905 and a number of Agricultural Colleges in different parts of the country carried out some of the earliest work mostly inthe form of pure line selections In subsequent years hybridization programmes in crops like wheat rice oilseeds grain legumes sugarcane and cotton yielded a large number of improved cultivars with significantly higher yields A turning point came in the 1960s with the development of hybrids in several crops including inter specific hybrids in cotton And when new germplasm with dwarfing genes became available in wheat and rice from CIMMYT and IRRI respectively Indian plant breeders quickly incorporated these genes into the genetic background of the country s widely grown varieties with excellent grain quality and other desirable traits This was to mark the beginning of modem agriculture in India as more and more varieties were developed characterized by a high harvest index and response to modem farm inputs like the inorganic fertilizers India s green revolution which has led to major surpluses offood grains and othercommodities like sugar and cotton has been made possible by the work of one of the largest groups of plant breeders working in a coordinated network
